**CHAIR'S SUGGESTED WAY FORWARD ON DRAFT OF CONSERVATION AND  
MANAGEMENT MEASURE FOR TROPICAL TUNA**

---

**WCPFC18-2021-16\_rev1<sup>1</sup>  
3 December 2021**

**WCPFC Chair**

---

<sup>1</sup> Rev 1 replaces the version issued on 1 November which was also issued as Circular 2021-94

## Chair's Suggested Way Forward Draft of 3 December 2021

### EXPLANATORY NOTE

As mentioned at the close of our 2<sup>nd</sup> day of meeting, I have given consideration to progressing the new tropical tuna measure in light of the discussions to date. I have appreciated considerably the engagement of CCMs in this process to date. However, in the circumstances I consider that it is important that I, as Chair, take some responsibility for moving things forward. This requires that I take a more “hands on” approach than would normally be the case, while respecting that CCMs need to work together on the final package.

I have therefore prepared a suggested way forward for the draft Tropical Tuna Measure which seeks to move the draft forward. In doing so I seek your cooperation in concentrating our limited time and resources on those provisions where the main divergences still lie.

In the interests of transparency, I wish to set out the general approach I have taken:

- Where there are clearly strongly opposing views on a particular paragraph or issue, the text is left as it is for further discussion. This includes the various elements in the package.
- If a new provision/paragraph is proposed, and there is objection to it: it is not included in the Chair's suggested way forward unless there is a clear view that further discussion might produce some agreement, or it is an element in the package.
- If new language is proposed within an existing paragraph, and there is some support for this, it is included in the Chair's draft unless there are strong objections.
- If new language is proposed within an existing paragraph, and there is no support for it, it is not included – ie the status quo maintained.
- If there is a proposal to delete an existing paragraph, and there is opposition to this, it is retained - ie the status quo is maintained.

The Suggested Way Forward is attached. It includes a column for comments in which I explain the approach. The Chair's suggested way forward in terms of language or comments are highlighted in yellow for ease of reference. The comments are also placed next to the green discussion point boxes for ease of reference.

The following provisions and issues are the ones on which I believe we need to concentrate in the remaining time left for WCPFC18:

- management objectives (paras 12-14);
- FAD closures (paras 16 and 17);
- High seas purse seine effort control (paras 26, 26 bis, 27, Table 2, footnote to Table 1);
- MCS measures for longline fisheries (paras 37 bis to 37 quinquies)

- zone-based management arrangements for longline BET, and bigeye longline catch limits (para 39, Table 3).

I seek your continued cooperation in concentrating on these important issues which together constitute the “package” on which we are seeking to agree.

By way of summary, I outline below the approach I have taken paragraph by paragraph.

**Preamble:** We have not yet discussed the Preamble. CCMs should perhaps consider using the same approach as outlined above.

**Paragraphs 1 and 11:** We agreed to merge paras 1 and 11 using US/EU language and another word for “thriving”.

**Paragraph 4:** Maintain status quo in light of objections.

**Paragraphs 8 and 9:** No agreement.

**Paragraphs 12 to 14:** Further discussion on these paragraphs is required. I suggest FFA and Japan provide a text on paragraph 13 on SKJ TRP.

**Paragraph 15:** I have deleted this paragraph in line with some views expressed.

**Paragraphs 16 and 17 and associated footnotes:** I consider that further discussion on these paragraphs is required as part of a package.

**Paragraph 18:** I have proposed that we revert to the status quo on this paragraph: ie. the language in the paragraph without the “small garbage” exception. We have lived with this provision for a number of years other than 2019 and there is no consensus to change this. Any amendment to CMM 2009-02 could be taken up separately, although I do not sense that there is a consensus on this either at this stage.

**Paragraph 19:** There are converging views on the desirability of addressing non-entangling FADs, with the main question being the timing for implementation of the requirement and the specifics of the non-entangling specifications. I suggest that further discussion take place on these issues.

**Paragraph 20:** FFA proposed language agreed.

**Paragraphs 21 and 22:** These are pending the outcome on paragraph 19, but there was agreement relating to further work on timeframes and definition of bio-degradable FADs.

**Paragraphs 23, 23 bis and 24:** Maintain status quo on para 23. Include reference to seeking advice from FAD MO IWG in para 24 with updated timeframes and reference to monitoring (which still needs to be included). No objection voiced to para 23 bis.

**Paragraph 25:** I propose retaining the first sentence of this paragraph. All limits should be included in the Table 1 of Attachment 1. This will require limits for Wallis and Futuna to be declared.

**Paragraphs 26, 26 bis and 27:** Retain status quo in paragraph 26, not include para 26 bis as there is opposition to this, and the streamlining of para 27 was agreed.

**Paragraph 28:** Agreement was reached on the FFA ALT, with the final sentence under consideration.

**Paragraph 30:** I propose retaining the original in line with CCM views.

**Paragraphs 31 to 37:** There appears to be agreement to retain these provisions.

**Paragraphs 37 bis to 37 quinquies:** I consider that there is merit in considering MCS provisions for longline vessels further to see if a consensus can be reached.

**Paragraph 38:** There is some support for retaining this provision. Since it is a long-standing provision, I proposed to retain the status quo.

**Paragraph 39:** The FFA proposal on zone base management arrangements should be discussed further.

**Paragraph 40:** Most CCMs suggest deletion of this paragraph. The MCS discussions for the longline fishery can be considered under paragraph 37 bis et seq.

**Paragraph 41:** This should be considered further together with MCS measures for longline fisheries.

**Paragraph 44:** There is no agreement on the scope of para 44.

**Paragraphs 45 to 49:** I propose retaining these paragraphs where not obsolete. Tables could perhaps set out the applicable capacity limits both for transparency and monitoring purposes.

**Paragraph 49 bis and 51 bis:** No support was voiced for including these proposals.

**Paragraph 50:** We agreed to delete this paragraph in view of the substantive work done to date on other commercial fisheries which has greatly assisted the Commission in assessing these fisheries.

**Paragraph 51:** Further consideration is required on this provision.

**Paragraphs 52 to 54:** I suggest that we retain the original of these provisions.

**Paragraph 54 bis:** There is insufficient support for a 'no data, no fish' provision so I propose not including it.

**Attachment 1, Table 1:** This table needs updating. Further discussion is required on the US footnote. This can take place in the context of discussion on Table 2.

**Attachment 1, Table 2:** This needs some further discussion.

**Attachment 1, Table 3:** This needs further discussion.

**Attachment 2:** I propose retaining this as the status quo.

My plan is to gauge whether there is support for my suggested approach in this Suggested Way Forward and to concentrate on the core issues I have identified above. Based on discussions, I will produce a further revised draft on Saturday 4 December. This will be a clean text of the agreed provisions. Depending on how discussions progress, it may also include proposals for some of the other thorny issues.

If we do not make much progress by the end of Day 3 (December 4), I would like to suggest a “packaged approach working group” be established or a Heads of Delegation meeting be convened to dedicate its work to discussing on the five key areas plus contingency plans just in case of failure to reach consensus on outstanding issues during the off-day on Sunday:

- management objectives (paras 12-14);
- FAD closures (paras 16 and 17);
- High seas purse seine effort control (paras 26, 26 bis, 27, Table 2, footnote to Table 1);
- MCS measures for longline fisheries (paras 37 bis to 37 quinquies)
- zone-based management arrangements for longline BET, and bigeye longline catch limits (para 39, Table 3).

For ease of reference of CCMs’ different positions on what the package should look like, and to facilitate our discussion, CCMs are requested, if possible, to fill out the format attached here to be presented at the workshop. I believe it is time for us to have a realistic and practical approach, and it is very important to identify acceptable levels of compromise of each CCM on a package in order to make a meaningful progress within a very limited time available.

Also as I indicated at the Heads of Delegation meeting and on Day 1, I would also like to ask for your kind understanding that Day 3, 4 and 5 may have to be extended by at least an hour to complete our work.

Thank you all again for your cooperation. I appreciate that negotiating a new tropical tuna measure in this virtual setting is not ideal. But I believe that we have come a long way, and with additional effort we will get there in the end.

Best regards

Jung-re Riley Kim

**WCPFC CHAIR**

cc: Feleti P Teo, OBE, WCPFC Executive Director

Josie Tamate, WCPFC Vice Chair

CCMs may choose to provide a single option or multiple options, and please indicate acceptable level of compromise to the extent possible.

|                       | Option 1 | Option 2 (optional) |
|-----------------------|----------|---------------------|
| Management Objectives |          |                     |
| FAD Closures          |          |                     |
| HS PS Effort Control  |          |                     |
| LL MCS Measures       |          |                     |
| LL BET Catch Limits   |          |                     |

| <p><i>[The Western and Central Pacific Fisheries Commission (WCPFC):</i></p> <p><b>[Recalling</b> that since 1999, in the Multilateral High Level Conferences, the Preparatory Conferences, and in the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (the Commission), a number of resolutions and Conservation and Management Measures (CMMs) have been developed to prevent or mitigate the overfishing of bigeye and yellowfin tuna and to limit the growth of fishing capacity in the Western and Central Pacific Ocean;]</p> <p><b>Recalling</b> that the objective of the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (the Convention) is to ensure through effective management, the long-term conservation and sustainable use of the highly migratory fish stocks of the Western and Central Pacific Ocean in accordance with the 1982 Convention and the Agreement;</p> <p><b>Recalling further</b> the final statement of the Chairman of the Multilateral High Level Conferences in 2000 that: “It is important to clarify, however, that the Convention applies to the waters of the Pacific Ocean. In particular, the western side of the Convention Area is not intended to include waters of South-East Asia which are not part of the Pacific Ocean, nor is it intended to include waters of the South China Sea as this would involve States which are not participants in the Conference” (Report of the Seventh and Final Session, 30th August- 5 September 2000, p.29);</p> | <p>Preamble will be discussed following substantive consideration of the text of the CMM</p> <p><b>US:</b> Strong interest in revisions</p> <p><b>PP1: FFA</b> propose deletion.<br/><b>EU:</b> agree FFA deletion as outdated.</p> |

*[Recognizing that the Scientific Committee has determined that the bigeye stock appears not to be experiencing overfishing and is not in an overfished condition and that the fishing mortality of bigeye should not be increased from the current level to maintain current or increased spawning biomass; that the yellowfin stock appears not to be experiencing overfishing and is not in an overfished condition and the current spawning biomass levels should be maintained; and that skipjack is currently moderately exploited, the fishing mortality level is sustainable, and that the spawning biomass be maintained near the target reference point;]*

**FFA ALT:** *[Recognizing that the Scientific Committee has:*

a) *determined that the bigeye stock is not overfished and is likely not experiencing overfishing; [Japan ALT: and, re-iterated that the Commission could continue to consider measures to reduce fishing mortality from fisheries that take juveniles, with the goal to increase bigeye fishery yields and reduce any further impacts on the spawning biomass for this stock in the tropical regions;]* and recommended, as a precautionary approach, that the fishing mortality on bigeye should not be increased from the level that maintains spawning biomass at 2012-2015 levels until the Commission can agree on an appropriate target reference point;

b) *determined that the yellowfin stock is not overfished and is not experiencing overfishing, and that the stock is currently exploited at relatively low levels [Japan ALT: and that the stock is currently exploited at relatively low levels; recommended the Commission notes that further increases in YFT fishing mortality would likely affect other stocks/species which are currently moderately exploited due to the multispecies/gears interactions in WCPFC fisheries taking YFT;]* and recommended as a precautionary approach that the fishing mortality on yellowfin tuna stock should not be increased from the level that maintains spawning biomass at 2012-2015 levels until the Commission can agree on an appropriate target reference point; and

c) *determined that the skipjack stock is not overfished and is not experiencing overfishing, and is currently moderately exploited and the fishing mortality level is sustainable; [Japan ALT: and is currently moderately exploited and the fishing mortality level is sustainable, at the same time, noted that fishing mortality is continuously increasing for both adult and juvenile while the spawning biomass reached the historical lowest level;]* and recommended that the Commission take appropriate management action to ensure that the biomass depletion level fluctuates around the TRP (e.g., through the adoption of a harvest control rule).]

*Recognizing further the interactions that occur between the fisheries for bigeye, yellowfin, and skipjack tuna;*

**FFA:** replace this PP with updated text in alignment with the most recent advice from the SC  
**Japan:** revise PPs based on latest SC management advice.  
**EU:** prefer to retain text that describes status of stocks.

**Japan:** addition based on SC report para 97.

**Japan:** deletion because redundant; addition based on SC report para 136.

**Japan:** deletion because redundant; addition based on SC report para 221.

*Noting* that Article 30(1) of the Convention requires the Commission to give full recognition to the special requirements of developing States that are Parties to the Convention, in particular small island developing States and Territories and possessions, in relation to the conservation and management of highly migratory fish stocks in the Convention Area and development of fisheries on such stocks, including the provision of financial, scientific, and technological assistance;

*Noting further* that Article 30(2) of the Convention requires the Commission to take into account the special requirements of developing States, in particular Small Island developing States and Territories. This includes ensuring that conservation and management measures adopted by it do not result in transferring, directly or indirectly, a disproportionate burden of conservation action onto developing States, Parties, and Territories;

*Noting* that Article 8(1) of the Convention which requires compatibility of conservation and management measures established for the high seas and those adopted for areas under national jurisdiction;

*Recalling* Article 8(4) of the Convention which requires the Commission to pay special attention to the high seas in the Convention Area that are surrounded by exclusive economic zones (EEZs);

*Noting* that the Parties to the Nauru Agreement (PNA) have adopted and implemented “A Third Arrangement Implementing The Nauru Agreement Setting Forth Additional Terms And Conditions Of Access To The Fisheries Zones Of The Parties”;

*Noting further* that the Parties to the Nauru Agreement have adopted and implemented a Vessel Day Scheme for the longline fishery, a Vessel Day Scheme for the purse seine fishery and a registry for FADs in the zones of the Parties, and may establish longline effort limits, or equivalent catch limits for longline fisheries within their exclusive economic zones.

*Noting furthermore* that the Members of the Pacific Islands Forum Fisheries Agency have indicated their intention to adopt a system of zone-based longline limits to replace the current system of flag-based bigeye catch limits within their EEZs [and a system of zone-based FAD set limits to replace the FAD closure and flag-based FAD set limits in their EEZs]; ~~[FFA: ALT: and a system of zone-based FAD set limits to replace the FAD closure and flag-based FAD set limits in their EEZs];~~

*Acknowledging* that the Commission has adopted a limit reference point (LRP) for bigeye, skipjack, and yellowfin tuna of 20% of the estimated recent average spawning biomass in the absence of fishing, [and, for skipjack tuna, has also agreed to an interim target reference point (TRP) of 50% of the recent average spawning biomass in the absence of fishing (CMM 2015-06)]; ~~[FFA: ALT: [and, for skipjack tuna, has also agreed to an interim target reference point (TRP) of 50% of the recent average spawning biomass in the absence of fishing (CMM 2015-06)];~~

**FFA:** propose deletion as redundant  
**EU:** supports FFA deletion

**FFA:** propose deletion as redundant  
**EU:** supports FFA deletion  
**Japan:** propose retention of current text as SKJ TRP in CMM 2015-06 still valid, as

|  |   |

Suggest insert for clarity.<br/> <b>Japan:</b> revise text so that the conclusions of past negotiations clearly reflected, particularly in terms of different treatment of non-SIDS vessels chartered by SIDS between EZs and high seas.</p> <p><b>Chair: no agreement</b></p> <p><b>FFA:</b> unless there is clear justification, para 9 should be removed to remove the disparity in Charter Notification between US territories and other SIDS.<br/> <b>US:</b> strongly support retention;</p> |

|  |   |
|--|---|
| <p><b>Overlap Area</b></p> <p>10. Where flag CCMs choose to implement IATTC measures in the overlap area, any calculation of limits for the Convention Area (excluding the overlap area) that are done on the basis of historical catch or effort levels, shall exclude historical catch or effort within the overlap area. Notwithstanding decisions on application of catch and/or effort limits, all other provisions of this measure apply to all vessels fishing in the overlap area.</p>   | <p>possibly combine paras 8 and 9.</p> <p>Generally agreed provision</p>  |
| <p><b>HARVEST STRATEGIES AND INTERIM OBJECTIVES FOR BIGEYE, SKIPJACK, AND YELLOWFIN TUNA</b></p> <p>11. [This measure is to create a bridge to the adoption of a harvest strategy for bigeye, skipjack, and yellowfin tuna stocks and/or fisheries in accordance with the work plan and indicative timeframes set out in the Agreed Work Plan for the Adoption of Harvest Strategies under CMM 2014-06, which includes the development of management objectives and target reference points. Taking into account the bridging role of this measure and the uncertainty framework for evaluating the impact of management measures on the bigeye stock, the Commission shall work towards achieving and sustaining the aims in paragraphs 12 to 14.]</p> <p><b>US ALT:</b> [This measure is intended and designed to support thriving fisheries for skipjack tuna, bigeye tuna, and yellowfin tuna in the Convention Area, and to do so in a way that is fair to all members and addresses the special requirements of developing States and participating territories. The measure's provisions are based on the [EU: interim] stock-specific objectives below, as well as other relevant provisions of the Convention and decisions of the Commission. As the harvest strategies for the tropical tuna stocks and/or their associated fisheries are developed, the objectives and provisions of the measure will be amended accordingly.]</p> | <p><b>Chair:</b> see paragraph 1.</p> <p>Some agreement that current management objectives are the starting point for discussion.</p> <p><b>FFA:</b> delete and merge with para 1 above.</p> <p><b>US:</b> proposed alt language. Open to merging with para 1.</p> <p><b>Chinese Taipei:</b> see comment and language on para 1. Re US ALT: the original para 1 and 11 are supported.</p> <p><b>EU:</b> add reference to fact are interim objectives pending addressing in Harvest Strategy work.</p> |

**Bigeye**

- Discussion Points**
- Inclusion of spatial component addressing spatial unevenness in SB depletion
  - Use of “the median SB/SBF=0 for 2000-2004.”

12. [Pending agreement on a target reference point the spawning biomass depletion ratio (SB/SB<sub>F=0</sub>) is to be maintained at or above the average SB/SB<sub>F=0</sub> for 2012-2015.] **US ALT** [and excessive spatial unevenness in spawning biomass depletion is to be avoided to support thriving fisheries throughout the Convention Area.]

**JP ALT:** Pending agreement on a target reference point, the spawning biomass depletion ratio (SB/SB<sub>F=0</sub>) is to be maintained at or above the median SB/SB<sub>F=0</sub> for 2000-2004.]

**Skipjack**

- Discussion Points**
- Using fishing mortality and setting a TRP based on the 2019 assessment
  - Using 2012 baseline for spawning biomass and PS effort limit
  - Doing without specific figures (baseline years, percentage, etc)
  - Inclusion of spatial component addressing spatial unevenness in SB depletion

**Chair:** no agreement

**FFA:** retain  
**USA:** add proposed spatial component.  
**Chinese Taipei:** support original.  
**US ALT** text contains words difficult to define.  
**EU:** not currently able to support US addition as not clear what it entails.  
**Korea:** does not support retention of this para without increase in fishing opportunities. Requests further detail on US proposal, noting complexity.  
**Japan:** fishing mortality CPUE

**Chair:** no agreement.  
**FFA/Japan** to suggest text.

| <p><b>Instrumented Buoys</b></p>  |  |
| <p><b>Discussion Points</b></p> <ul style="list-style-type: none"> <li>▪ Number of FADs with activated instrumented buoys</li> <li>▪ Reporting arrangement for daily information and monthly submission</li> </ul>  |  |
| <p>23. <u>[A flag CCM shall ensure that each of its purse seine vessels shall have deployed at sea, at any one time, no more than [350] drifting Fish Aggregating Devices (FADs) with activated instrumented buoys. An instrumented buoy is defined as a buoy with a clearly marked reference number allowing its identification and equipped with a satellite tracking system to monitor its position. The buoy shall be activated exclusively on board the vessel. A flag CCM shall ensure that its vessels operating in the waters of a coastal State comply with the laws of that coastal State relating to FAD management,</u></p>   |  |

including FAD tracking.] [EU: In order to support the monitoring of compliance with the limitation established in Paragraph 23, while protecting any confidential data, CCMs shall, starting on 01/01/2022, report, or require their vessels to report, daily information on all active FADs to the Secretariat. Such information shall contain, date, instrumented buoy ID, assigned vessel and daily position, which shall be compiled at monthly intervals, to be submitted by CCMs to the WCPFC Secretariat with a time delay of no longer than 30/45/... days.]

EU: proposed reporting language aimed at ensuring monitoring of obligation.  
**Chinese Taipei:** meaning of FAD, “active FAD” and “instrumented buoys” should be clarified. Number of FADs needs discussion. Support further discussion in FAD MO-IWG.  
**Korea:** info being provided to PNA. Should avoid duplication.

- Discussion Points**
- dFAD management, retrieval and lost dFAD reporting provision

**Chair:** include as no objection voiced

**FFA ALT: 23bis.** CCMs shall also encourage vessels to:

- a) responsibly manage the number of drifting FADs deployed each year,
- (b) carry equipment on board to facilitate the retrieval of lost drifting FADs,
- (c) make reasonable efforts to retrieve lost drifting FADs
- (d) report the loss of drifting FADs, and if the loss occurred in the EEZ of a coastal State, report the loss to the coastal State concerned.]

**FFA:** proposal

- Discussion Points**
- Review provision with 2023 time frame

**Chair:** agreed FFA ALT 24 with addition of reference to monitoring (still to include)

24. [The Commission at its [2019] annual session, based on consideration in the FAD Management Options Intersessional Working Group, shall review

|  |  |
|--|--|

ROP reports for trips taken during FADs closure period shall be given priority for data input and analysis by the Secretariat and the Commission’s Science Provider.</p> <p>37. VMS polling frequency shall be increased to every 30 minutes during the FAD closure period. The increased costs associated with the implementation of this paragraph will be borne by the Commission.</p>  | <p>Agreed retain<br/>Past compliance issues with this para.</p> <p>Agreed retain</p> <p>Agreed retain</p>                                       |

## Monitoring and Control: Longline Fishery

### Discussion Points

- 6-hour prior entry/exit report for HS from Jan 1, 2023
- Provision of daily operational level data via e-reporting from Jan1, 2023
- Tasking TCC 18 with considering BET tracking system for adoption by the Commission in 2023
- Establishment of a Regional Electronic Monitoring system by 2023
- Tasking TCC 18 with considering with reviewing CMM 2009-06 on transshipment for adoption of a revised transshipment CMM by the Commission in 2022

**Chair: no agreement**

**FFA ALT: 37 bis.** By 1 January 2023, the Secretariat shall develop an online secure portal for the automated electronic submission by vessels of the reports required by this paragraph. From 1 January 2023, flag States shall require their vessels to submit reports either directly or via such organisations designated by the flag state to the Commission, at least 6 hours prior to entry and no later than 6 hours prior to exiting the high seas in the Convention Area. Such reports shall also contain estimated catch (kilograms) on board. The report shall contain the following:

VID/Entry/Exit: Date/Time\*; Lat/Long\*; YFT/ BET/ ALB/ SKJ/ SWO/ SHK/ OTH/ TOT(kgs) /TRANSHIPMENT (Y/N)

\*: Of anticipated point of entry or exit

**37 ter.** CCMs shall ensure that fishing vessels flying their flag and fishing on the high seas in the Convention Area, submit operational catch and effort data daily through electronic means from 1 January 2023.

3. TCC18 shall consider a proposal to track bigeye catch from the point of capture to the first point of sale, with a view to adoption by the Commission in 2023.

**37 quater.** By 2023, the Commission shall establish a WCPFC Regional Electronic Monitoring Programme. The ERandEM Working Group is tasked with undertaking the necessary work to meet this deadline. TCC18 shall consider a proposal on the Minimum Standards for WCPFC Regional Electronic Monitoring Programme with a view to adoption by the Commission in 2022.

**37 quinques.** TCC18 shall consider the work of the transshipment Intersessional Working Group to review CMM 2009-06 with a view to adoption by the Commission of a revised transshipment measure in 2022.]

Divergent views.  
**US:** revise Annex C of CMM 2018-05 to increase the minimum level of observer coverage in LL fisheries from 5% to 10%, effective January 1, 2023.

**FFA:** Proposals para 37 bis to 37 quinques.

\*Provisional and maybe subject to revision following data analysis and verification

Japan will make an annual one-off transfer of 500 metric tonnes of its bigeye tuna catch limit to China.]

**Attachment 2: Measure for Philippines**

**Chair: keep status quo**

1. This Attachment shall apply to Philippine traditional fresh/ice chilled fishing vessels operating as a group.

Not considered

**AREA OF APPLICATION**

2. This measure shall apply only to High Seas Pocket no. 1 (HSP-1), which is the area of high seas bounded by the Exclusive Economic Zones (EEZs) of the Federated States of Micronesia to the north and east, Republic of Palau to the west, Indonesia and Papua New Guinea to the south. For the purposes of this measure, the exact coordinates for the area shall be those used by the WCPFC vessel monitoring system (VMS). A map showing the HSP-1 Special Management Area is attached.

**REPORTING**

3. Philippines shall require its concerned vessels to submit reports to the Commission at least 24 hours prior to entry and no more than 6 hours prior to exiting the HSP-1 SMA. This information may, in turn, be transmitted to the adjacent coastal States/Territories.

The report shall be in the following format:

VID/Entry or Exit: Date/Time; Lat/Long

4. Philippines shall ensure that its flagged vessels operating in the HSP-1 SMA report sightings of any fishing vessel to the Commission Secretariat. Such information shall include: vessel type, date, time, position, markings, heading and speed.

**OBSERVER**

5. The fishing vessels covered by this measure shall employ a WCPFC Regional Observer on board during the whole duration while they operate in HSP-1 SMA in accordance with the provisions of CMM 2018-05.

6. Regional Observers from other CCMs shall be given preference/priority. For this purpose, the Philippines and the Commission Secretariat shall inform the CCMs and the Adjacent Coastal State of the deployment needs and requirements at 60 days prior expected departure. The Secretariat and the CCM that has available qualified regional observer shall inform the Philippines of the readiness and availability of the Regional Observer at least 30 days prior to the deployment date. If none is available, the Philippines is authorized to deploy regional observers from the Philippines.

**VESSEL LIST**

7. The Commission shall maintain an updated list of all fishing vessels operating in HSP1 SMA based on the foregoing vessel's entry and exit reports submitted to the Commission. The list will be made available to Commission Members through the WCPFC website.

## MONITORING OF PORT LANDINGS

8. The Philippines shall ensure that all port landings of its vessels covered by this decision are monitored and accounted for to make certain that reliable catch data by species are collected for processing and analysis.

## COMPLIANCE

9. All vessels conducting their fishing activities pursuant to this Attachment to CMM 2018-01 shall comply with all other relevant CMMs. Vessels found to be non-compliant with this decision shall be dealt with in accordance with CMM 2010-06, and any other applicable measure adopted by the Commission.

## EFFORT LIMIT

10. The total effort of these vessels shall not exceed 4,659<sup>14</sup> days. The Philippines shall limit its fleet to 36 fishing vessels (described by the Philippines as catcher fishing vessels) in the HSP-1 SMA.

<sup>14</sup> Reference Table 2(b), WCPFC9-2012-IP09\_rev3

- Map Showing HSP-1 SMA Where the Arrangements in Attachment 2 Apply

This map displays indicative maritime boundaries only. It is presented without prejudice to any past, current or future claims by any State. It is not intended for use to support any past, current or future claims by any State or territory in the western and central Pacific or east Asian region. Individual States are responsible for maintaining the coordinates for their maritime claims. It is the responsibility of flag States to ensure their vessels are informed of the coordinates of maritime limits within the Convention Area. Coastal States are invited to register the coordinates for their negotiated and agreed maritime areas with the Commission Secretariat.
