Table 35. Coverage levels of the ACTIVITY field - POLE-AND-LINE	37
Table 36. Coverage levels of the ACTIVITY DATE field - POLE-AND-LINE.....	38
Table 37. Coverage levels of the KEY SPECIES – POLE-AND-LINE	39
5. Summary of additional operational data fields by gear type	40
Table 38. List of additional operational data fields – LONGLINE.....	40
Table 39. List of additional operational data fields – PURSE SEINE.....	40

1. Introduction

1. SC17 noted that the evaluation on data gaps regarding provision of operational catch and effort data required under the [Scientific Data to be Provided by the Commission](#) (SciData) is based on whether the field is included in a data submission, rather than on an evaluation of data quality or completeness. Even if a data field is included in the data submission, it is possible that it may not be completed for each fishing operation, but this level of completeness (coverage) for each data field has not been undertaken to date.

2. The following SC17 recommendation requesting the coverage for each operational data field, is aimed at improving the quality and completeness of the data in the future.

Data gaps of the Commission

4. *SC17 recommended that the SSP add a new annex to the data gaps paper to include a breakdown of the coverage levels for each operational data field by year and fleet.*

3. This paper provides tables (Tables 2–37) of the estimated coverage of data provided by GEAR, FLEET and YEAR, and the coverage levels for each required operational catch effort data field GEAR, FLEET and YEAR. Table 1 provides supplementary information on the format and contents of the tables presenting in this paper, although some tables also have notes specific to the table.

Table 1. Notes on the information presented in the tables of this paper

NOTES
White cells indicate years when the fleet was not active
Cells with “X” and black background indicate years when the fleet was active but operational data was not provided or yet to be loaded into the WCPFC databases. For example, (i) some logbook data have been received from Indonesia but coverage is very low (not representative) and key fields are missing so the data have not been unloaded, and (ii) logbook data have been received from Vietnam but they are using a national logbook and differentiation between longline and handline has not yet been finalized in the data submitted.
Coverage is represented with a % and colour coded to facilitate an overall visual impression of trends over time for each fleet.
This evaluation does <u>not</u> consider the special submission of historical operational longline data provided by Japan, Korea, Chinese Taipei and the USA which are specifically used for CPUE standardization analyses. The requirements for these data are different to the requirements under the Scientific Data to be Provided by the Commission and so have not been considered here.
In some cases, the data fields for trip-level departure, return/unloading/transshipment information were not provided, although there is information available within daily records, and/or through VMS data to indicate the trip-level departure/return data fields. These tables represent the coverage when data fields for trip-level departure, return/unloading/transshipment information are provided only.

4. The WCPFC Scientific Service Provider (SSP) has already started the process to engage with relevant CCMs to resolve some of the gaps presented in these tables.

5. This paper also provides an indication of the frequency of data (i.e. the number of CCMs providing data) for additional fields that are not currently required under the SciData (see Tables 38 and 39).

2. Longline fishery operational data fields

Table 2. Coverage of Longline operational data submitted to the WCPFC

Notes

- The coverage of operational data provided has been determined by comparing the total catch in weight of the target species available in the operational data, to the total annual catch estimate of the target species.

Notes

1. There is a total of 15 separate WCPFC Key Species/Species groups : Albacore tuna, bigeye tuna, skipjack tuna, yellowfin tuna, striped marlin, blue marlin, black marlin, swordfish, blue shark, silky shark, oceanic whitetip shark, mako sharks, thresher sharks, porbeagle shark, hammerhead sharks. Whale sharks are not expected to be in the longline catch.
2. The coverage of KEY SPECIES is a measure of whether there is at least one record of each of the WCPFC Key species/species groups in the available data for each FLAG/YEAR combination. For example, if all 15 key species/species groups were recorded in one year, then the coverage for key species would be 100%.

3. Purse seine fishery operational data fields

Notes

1. The coverage of operational data provided has been determined by comparing the total catch in weight of the target species available in the operational data, to the total annual catch estimate of the target species.
2. The coverage of operational data for Japan is for the tropical fishery only (south of 20°N).

VIETNAM	X	X	X	X	X	X	X	X	X	X	19%	X	X	X	X	X	X	X

Notes

1. There is a total of 15 separate WCPFC Key Species/Species groups : Albacore tuna, bigeye tuna, skipjack tuna, yellowfin tuna, striped marlin, blue marlin, black marlin, swordfish, blue shark, silky shark, oceanic whitetip shark, mako sharks, thresher sharks, porbeagle shark, hammerhead sharks and whale sharks.
2. The coverage of KEY SPECIES is a measure of whether there is at least one record of each of the WCPFC Key species/species groups in the available data for each FLAG/YEAR combination. For example, if all 16 key species/species groups were recorded in one year, then the coverage for key species would be 100%. If the three target tuna species are recorded only, then the key species coverage would be 19%

4. Pole-and-line fishery operational data fields

Notes

1. The coverage of operational data provided has been determined by comparing the total catch in weight of the target species available in the operational data, to the total annual catch estimate of the target species.
2. The coverage of operational data for Japan is for the tropical fishery only (south of 20°N).

Notes

1. There is a total of 15 separate WCPFC Key Species/Species groups : Albacore tuna, bigeye tuna, skipjack tuna, yellowfin tuna, striped marlin, blue marlin, black marlin, swordfish, blue shark, silky shark, oceanic whitetip shark, mako sharks, thresher sharks, porbeagle shark, hammerhead sharks. Whale sharks are not anticipated to be in the pole-and-line catch.
2. The coverage of KEY SPECIES is a measure of whether there is at least one record of each of the WCPFC Key species/species groups in the available data for each FLAG/YEAR combination. For example, if all 15 key species/species groups were recorded in one year, then the coverage for key species would be 100%. If the three target tuna species are recorded only, then the key species coverage would be 20%

5. Summary of additional operational data fields by gear type

Table 38. List of additional operational data fields – LONGLINE

LONGLINE	
Additional fields	No. of CCM Fleets (2015-2021)
Whale predation in set	3
Sea surface Temperature (SST)	0
Set number	22
Permit	20
Captain	18
Crew number	0
Bait species	12
Number of baskets	0
Floatline length	0
Branchline length	0
Distance between floats	1
Target species	22

Table 39. List of additional operational data fields – PURSE SEINE

PURSE SEINE	
Additional fields	No. of CCM Fleets (2015-2021)
Well information	17
Permit	18
Captain	18
Crew number	0
