

## **FOURTH REGULAR SESSION**

3-7 December 2007

Tumon, Guam, USA

---

### **IWG-ROP CHAIR'S DRAFT ON ROP IMPLEMENTATION**

---

**WCPFC4-2007/23 (Rev.1)**

**5 December 2007**

**Annex C (revised)**

#### **Chair's Draft**

#### **Implementation Programme**

1. When the measure enters into force, CCMs will commence implementation of the ROP, in accordance the measure adopted at WCPFC 4, by using the sub-regional and national programmes already operational in the region. CCMs are encouraged to submit data from such programmes as soon as possible.
2. At the direction of the Commission, the IWG-ROP will continue to develop the framework and important elements of the ROP (e.g., training and accreditation of observers, roles and responsibilities of observers, data requirements, cost issues, and appropriate effort units for expressing coverage levels).
3. Arrangements in 2008 do not preclude future development of the ROP at the Commission.
4. No later than 31 December 2008:
  - Existing sub-regional program and National Programs will be regarded as a part of ROP, and will continue unless otherwise determined by the Commission.
  - Data obtained through these observer programs will be submitted to the Commission and will be considered Commission data.
5. During the period 1 January 2009 – 31 December 2010:
  - The Commission will review the recommendations from the IWG-ROP, SC, and TCC and further develop, and refine as necessary, the ROP, including application of the ROP.
6. No later than 30 June 2012:

- Achieve 5% coverage of the effort in each fishery under the jurisdiction of the Commission (except for vessels provided for in paragraphs 9 and 10). In order to facilitate the placement of observers the logistics may dictate that this be done on the basis of trips.
7. At the 2012 annual sessions of the SC and TCC the data generated by the ROP will be reviewed and those subsidiary bodies will make appropriate recommendations to the Commission. Based on the advice and recommendations of the SC and TCC, the Commission will annually review the ROP and make adjustments as necessary. Among the elements of the ROP to be reviewed are the provisions of paragraph 10 on vessels initially deferred from application of the ROP.
  8. CCMs will also be expected to meet any additional ROP observer obligations that may be included in any measure adopted by WCPFC, such as provisions of a catch retention measure, a FAD management measure or a transshipment measure. Such measures may include observer requirements for freezer longliners, purse seiners and/or carriers.

### **Special Circumstances**

9. Fishing vessels used exclusively to fish for fresh fish<sup>1</sup> in the area north of 20 degrees North will be accorded the following considerations:
  - i) At its 2008 annual session, the Northern Committee will consider the implementation of the ROP adopted by the Commission for fishing vessels used to fish for fresh fish in the area north of 20 degrees North.
  - ii) At its 2010 annual session, the Northern Committee will make recommendations to the Commission on the implementation of the ROP for fishing vessels for fresh fish in the area north of 20 degrees North.
  - iii) The recommendations of the Northern Committee will provide a date for implementation of the ROP by vessels fishing for fresh fish in the area north of 20 degrees North no later than 31 December 2014.
10. Application of the ROP to the following fishing vessels is to be deferred:
  - small fishing vessels, defined to be [ ] and determined to include [ ]
  - troll and pole-and-line vessels used for fishing for skipjack tuna or albacore

---

<sup>1</sup> For the purpose of this measure, “fresh fish” means highly migratory fish stocks that are live, whole or dressed/gutted, but not further processed or frozen.
