According to Paragraph 8 of the WCPFC CMM 2023-02, fishing efforts and the catch of Pacific bluefin tuna are compiled based on WCPFC Members' reports, which are annexed in Tables 1 and 2.

8. *CCMs shall report to the Executive Director by 31 July each year their fishing effort and <30 kg and >=30 kg catch levels, by fishery, for the previous 3 year, accounting for all catches, including discards. CCMs shall report their annual catch limits and their annual catches of PBF, with adequate computation details, to present their implementation for paragraph 5 and 6, if the measures and arrangements in the said paragraphs and relevant footnotes applied. The Executive Director will compile this information each year into an appropriate format for the use of the Northern Committee.*

The information in the Tables below will be modified subject to any further updates from Members.

Individual Country Report is available at *Delegation Proposals and Papers* folder at <https://meetings.wcpfc.int/meetings/jwg-09>

[Philippines does not have a fishery that targets BFT. PH catch for this species is merely incidental/occasional from artisanal handline/hook-and-line fishery. PH do not catch juvenile PBFT. PH has improved and strengthened its monitoring and data gathering initiatives to monitor landings of this species.](#)

[For 2023, Philippines has 4.436MT record of PBFT catches approximately 19 pieces with individual weight ranges from 149 kilograms to 455 kilograms as reported during the 15th WPEA-NSAP tuna catch estimate review workshop.](#)
