

**SCIENTIFIC COMMITTEE
TWENTY-SECOND REGULAR SESSION**
11-19 August 2026
Apia, Samoa (Hybrid)

Meeting ICT Connectivity and Access Information

**WCPFC-SC22-2026-15
10 August 2026**

1. Wi-Fi Access

The Wi-Fi network name and password will be displayed on the **Meeting Information Slide**.

2. Viewing Presentations – In-Person Participants

To help manage venue bandwidth, in-person participants will not be provided with Zoom links. Presentations can instead be viewed on personal devices using [ScreenLeap](#). Instructions for accessing ScreenLeap will be displayed on the Meeting Information Slide.

3. Listening to Meeting Audio

In-person participants can listen to the meeting audio through two methods:

- **Listening via Personal Devices:** The [ListenWiFi app](#) can be installed on personal phones or tablets. Information on how to download and access the app will be provided on the Meeting Information Slide.
- **Listening via FM Transmitter Device:** A personal listening device and earphone set can be given to listen to the meeting audio. The device is given by the meeting registrar. The meeting registrar can also provide instruction on how to operate the device.

It is recommended that personal devices are used with the ListenWiFi app, as audio quality is ensured through the user's personal audio device.

4. Microphones – Online Participants

Online participants are kindly reminded to mute their microphones after speaking or making an intervention to minimize background noise and interruptions.

5. Zoom Links – Online Participants

Each Zoom link is unique to the individual participant. Please do not share your Zoom link with others, as this may affect your access to the meeting.
