**TABLE 1 -- Notes:**

1. Source: Raised logsheet data.
2. The column labeled "CMM-2008-01" does not take into account paragraphs 6 and 7, and footnote 2 of CMM 2008-01
3. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
4. Purse-seine days for Indonesia and the Philippines have been estimated according to Appendix A in the SC4 Statistics SWG Working paper WP-4 (Data relating to purse-seine effort on the high seas and in the zones of non-PNA member CCMs).
5. The definition of days effort in this table may differ from the definition of days used in the PNA Vessel Day Scheme (VDS)
6. The Total International waters effort does not include estimates of effort for the Philippines domestic fleet at this stage (refer to note on the Philippines in Table 2(b)).
7. In 2012, some components of the tropical purse seine fleet have changed criteria for reporting days with searching (included as a fishing day) and transiting (not included as a fishing day) and this is reflected in the decline in fishing days for 2012.

**Table 2(a). Purse seine days fished in international waters in the WCPFC-CA between 20°N and 20°S, by flag, based on available operational data.**

**TABLE 2 -- Notes:**

1. Source: Raised logsheet data. 2012 data are provisional.
2. The column labeled "CMM-2008-01" does not take into account paragraphs 6 and 7, and footnote 2 of CMM 2008-01
3. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
4. Purse-seine days for Indonesia have been arbitrarily assigned 500 days for high seas according to Appendix A in the SC4 Statistics SWG Working paper WP-4 (Data relating to purse-seine effort on the high seas and in the zones of non-PNA member CCMs)
5. The New Zealand purse seine fleet are covered by the reference in footnote 2 in paragraph 10 of CMM2008-01, and the days in Table 2 of CMM 2008-01. Using this footnote, New Zealand can use the days from 2003.
6. The International waters effort for the Philippines domestic fleet is not included since effort for years other than 2004 are not available (refer to note on the Philippines in Table 2(b)).
7. During September 2012, USA and Chinese Taipei advised the WCPFC Secretariat of their estimates for 2011, which differ from the values above, and will be reviewed by SPC in due course once 2011 operational data are complete and available. The estimates could also vary due to, inter alia, differences in the respective EEZ coordinates used.
8. In 2012, some components of the tropical purse seine fleet have changed criteria for reporting days with searching (included as a fishing day) and transiting (not included as a fishing day) and this is reflected in the decline in fishing days for 2012.
9. WCPFC8 agreed that the limit for Ecuador and El Salvador be based on high seas excluding the WCPFC/IATTC overlap area and so the days presented here for these fleets excludes the effort in the overlap area. Total days in Table 2(a) do not therefore reconcile with total high seas days in Table 1.

**Table 2(b). Limit estimates for the high seas and the zones of non-PNA CCMs (and non-WCPFC members) established by CMM-2008-01 between 20°N and 20°S average vessel days 2001-2004 or 2004)**

<b>LIMIT ESTIMATE [CMM 2008-01]</b>		12,523		13,266		2,326	

## Table 2(b) - NOTES

Where not stated, the estimates of high seas effort have been determined using raised operational logsheet data held by the SPC, subject to interpretation of paragraph 6 and 7 of CMM 2008-01. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP.

1.	<p><b>ECUADOR</b></p> <p>Values presented here are from Operational data provided to WCPFC. WCPFC8 agreed that the limit for Ecuador be based on high seas excluding the WCPFC/IATTC overlap area but the days presented here for these fleets INCLUDES the effort in the overlap area. Total days in Table 2(b) do not therefore reconcile with total high seas days in Table 2(a).</p>
2.	<p><b>EL SALVADOR</b></p> <p>Values presented here are from Operational data provided to WCPFC. WCPFC8 agreed that the limit for El Salvador be based on high seas excluding the WCPFC/IATTC overlap area but the days presented here for these fleets INCLUDES the effort in the overlap area. Total days in Table 2(b) do not therefore reconcile with total high seas days in Table 2(a).</p>
3.	<p><b>EU-SPAIN</b></p> <p>Operational data are now available and used to produce these estimates.</p>
4.	<p><b>INDONESIA</b></p> <p>WCPFC (SPC-OFP) does not have any operational catch/effort data for the Indonesia domestic purse seine fleet to determine the extent of activities by area, so the following methods have been used in the absence of the data.</p> <p>1. National waters</p> <p>For 2004, the average CPUE (SKJ+YFT+BET)/days = 24 MT/day in the tropical waters of the WCPFC Convention Area. Applying this to the total purse seine catch estimates for domestic Indonesia purse seine fishery in 2004 (164,721 mt) gives 6,363 days (after subtracting an arbitrary estimate of 500 days for activities on the high seas – see below).</p> <p>For 2003-2006, the average CPUE (SKJ+YFT+BET)/days = 26.5 MT/day in the tropical waters of the WCPFC Convention Area. Applying this to the annual average purse seine catch estimate for domestic Indonesia purse seine fishery for 2003-2006 (170,243 mt) gives 5,924 days (after subtracting an arbitrary estimate of 500 days for activities on the high seas – see below).</p> <p>2. High seas</p> <p>WCPFC (SPC-OFP) doesn't have any effort data for the Indonesia domestic purse seine fleet but presumably they fish in the high seas enclave between FSM, PNG, Palau and Indonesia. If this effort is assumed to be similar to the effort of the Philippines fleet based in PNG, a value of 500 days could possibly be attributed to fishing in the high seas by the Indonesian fleet.</p>

5.	<p><b>JAPAN</b></p> <p>Complete operational logsheet data provided to the Commission on 16<sup>th</sup> April 2009 in relation to CMM 2008-01. These data represent 100% coverage and therefore a better source of data to estimate high seas effort, so the estimates have been revised compared to information presented to WCPFC5.</p>
6.	<p><b>KOREA</b></p> <p>[12 Sep 2008] Advice from Korea Indicates that average fishing days from 2001 to 2004 are 1,571 days and fishing days in 2004 are 1,531 days. Yet to be reconciled since the source of EEZ coordinates used to estimate high seas days is unknown. Also we are not sure of their definition of "DAY". SPC estimates 1,234 days for 2004 and 1,230 as the average for 2001-2004.</p>
7.	<p><b>NEW ZEALAND</b></p> <p>The New Zealand purse seine fleet are covered by the reference in footnote 2 in paragraph 10 of CMM2008-01, and the days in Table 2 of CMM 2008-01. Using this footnote, New Zealand can use the days from 2003, which is 343 days – 247 days in high seas pockets 1&amp;2 and 96 days in the remaining high seas areas.</p>
8.	<p><b>PHILIPPINES</b></p> <p>According to logsheet data provided to the WCPFC by the Philippines, the total high seas effort by the Philippines domestic and PNG-based fleets (as at August 2010) amounts to 5,647 days. The effort in national waters for 2004 according to the logsheet data are 1,075 days. However, the logsheet data have not been verified and do not represent 100% coverage and information to raise these data is currently not available.</p> <p>The estimate of high seas effort by the domestic Philippines purse seine fleet for 2004 provided by the Philippines was 4,659 days. The estimate for effort in national waters provided by the Philippines is 5,477 days. These estimates differ from what are determined from the unraised, logsheet data but have been retained in Table 2(b) as the best available estimates.</p> <p>Estimates of high seas effort for the domestic Philippines purse seine fleet for years other than 2004 have not been provided by the Philippines as yet.</p>
9.	<p><b>PNG</b></p> <p>[20 Aug 2009] PNG provided revised purse-seine catch estimates for 2004–2007 in their 2008 provision of data to the WCPFC, which resulted in a change in the estimated purse seine effort.</p>
10.	<p><b>USA</b></p> <p>[13 Sep 2008] USA has provided a value of 1,066 days as the average for 2001-2004, but only 1,038 days have been determined using the data available to the WCPFC (SPC-OFP). The WCPFC (SPC-OFP) are currently working with US-NMFS to review the respective EEZ coordinates used in the process of determining high seas days.</p>

	<p>Effort limits cannot be applied to vessels operating under the US Multilateral purse-seine Treaty when in the national waters of Pacific Island countries, which is referenced in paragraphs 6 and 7 of CMM 2008-01.</p>
11.	<p><b>Other Non-WCPFC CCM</b></p> <p>This entity relates to fleets based in the Eastern Pacific Ocean or IATTC-member country fleets providing data to IATTC, but excluding fleets for which the WCPFC already hold operational data (e.g. Vanuatu, El Salvador, Ecuador, Spain and the USA) .</p> <p>Other fleets that may support purse seine effort on WCPO tuna stocks may include Malaysia and Vietnam but data are not available to include consideration of this possible effort here.</p> <p>1. Days in national waters within the WCPFC Convention Area.</p> <p>For 2001-2004, none of these fleets were licensed to fish in national waters according to information currently available, so no fishing activity by non-WCPFC CCM fleets has been attributed to national waters. (0 days)</p> <p>For 2003-2006, none of these fleets were licensed to fish in national waters according to information currently available, so no fishing activity by non-WCPFC CCM fleets has been attributed to national waters. (0 days)</p> <p>2. High Seas</p> <p>From IATTC data, after removing El Salvador, Ecuador, Spain and Vanuatu fleet effort (which are already counted), the effort in 2004 for these fleets fishing in the WCPFC Convention Area was the same as the average effort for 2001-2004. For 2001-2004, the number of days effort in the WCPFC Convention Area was 33 days, according to aggregate data provided by IATTC data. (33 days).</p> <p>For 2003-2006, the number of days effort in the WCPFC Convention Area was 21 days, according to best available operational and aggregate data provided by IATTC data.</p>

Table 3. Reported longline catches (metric tonnes) of bigeye tuna in the WCPFC-CA, by flag.

**TABLE 3 -- Notes:**

1. Source: WCFPC Annual catch estimates as at 17th July 2013 (2012 data are provisional).
2. Catch estimates in **red** have been carried over from previous years.
3. Indonesia and Philippines have recently revised their estimates in recent years. (see the respective Annual Catch Estimate Workshop reports at (<http://www.wcpfc.int/west-pacific-east-asia-oceanic-fisheries-management-project>))
4. The limits in the column labeled "CMM 2008-01 - 2010 limits" and "CMM 2012-01 limits" do not apply to small island developing State members and participating Territories according to paragraph 34 of CMM 2008-01 and CMM 2012-01.
5. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
6. The year 2004 shall apply to China, the United States and Indonesia. (CMM 2008-01 Footnote 3).
7. Attachment F in the CMM 2008-01 (BASELINE LONGLINE BIGEYE TUNA CATCHES, BY FLAG) represents the bigeye catch estimates available at the time of establishing CMM 2008-01.
8. Estimates include archipelagic water catches which for some countries cannot be separated at this stage (e.g. Philippines).
9. For China, Para 36 overrides the reduction in catches listed in Para 33 in regards to 2009 and 2010 limits.
10. The catch limits established at 2,000t prior to 2010, remain at the level of 2,000t. (according to CMM 2008-01 Para. 32)
11. The catch limits reduced by 20% for 2010 that fall below 2,000t. are to be set at 2,000t. (Para. 38)
12. The catch limit set for Belize prior to 2009 is retained for 2009, according to WCFPC6 Report (Para. 27)
13. Senegal committed to limiting its fishing activities in the WCPF Convention Area to one longline vessel - WCFPC5 Report (Para. 44)
14. The Vietnam longline fleet are understood to fish outside the WCFPC Convention Area (South China Sea).
15. Catches by the Chinese longline fleet in the Kiribati EEZ are included in the estimates.
16. Catches by chartered Chinese, Korean and Chinese-Taipei longline vessels licensed to fish in Solomon Islands waters have been attributed to the Solomon Islands for 2010 and 2011.
17. Para 35 applies to the US so the limit for 2010 will be a 10% reduction of the 2004 baseline catch in Attachment F.
18. Does not yet cover development of new fisheries in the waters of small-island developing states (e.g. Tokelau)
19. Indonesia bigeye tuna catch excludes catches in Archipelagic waters.
20. Korea and Chinese Taipei will voluntarily restrict its catch level at 2% less than the catch limits specified here in 2013.

**Table 4. Estimates of total annual catches (metric tonnes) of bigeye tuna in the WCPFC Statistical Area for fisheries other than longline and tropical purse seine.**

**TABLE 4 -- Notes:**

1. Source: WCFPC Annual catch estimates as at 17th July 2013 (2012 data are provisional).
2. Catch estimates in **red** have been carried over from previous years.
3. French Polynesia 'pole-and-line' catches include the *bonitier* and *poti marara* fleets; both use various gear types (pole-and-line, troll, handline, harpoon, gill net).
4. Japan purse seine is north of 20°N.
5. Reference to the level of "*less than 2,000 tonnes*" mentioned in CMM-2008-01 paragraph 39 has been assumed to mean that fisheries taking less than 2,000 t. of bigeye should not exceed 2,000 t. of bigeye.
6. Indonesia and Philippines have recently revised their estimates (see the respective Annual Catch Estimate Workshop reports held during 2010, 2011 and 2012 at (<http://www.wcpfc.int/west-pacific-east-asia-oceanic-fisheries-management-project>))
7. A certain component of the Philippines catches listed in this table occur in Archipelagic Waters , but can not be separated from total Conventional Area Annual Catch Estimates at this stage.
8. The limits in the column labeled "CMM 2008-01" do not apply to small island developing State members and participating Territories according to paragraph 34 of CMM 2008-01.
9. The provision of estimates of fishing effort for 2009, 2010 and 2011, according of Para. 39 of CMM 2008-01, is only available for Japan purse-seine fishery at this stage.
10. Indonesia yellowfin tuna catch excludes catches in Archipelagic waters.

Table 5. Estimates of total annual catches (metric tonnes) of yellowfin tuna in the WCPFC Statistical Area for fisheries other than longline and tropical purse seine.

**TABLE 5 -- Notes:**

1. Source: WCFPC Annual catch estimates as at 17th July 2013 (2012 data are provisional).
2. Catch estimates in **red** have been carried over from previous years.
3. Indonesia and Philippines have recently revised their estimates (see the respective Annual Catch Estimate Workshop reports at (<http://www.wcpfc.int/west-pacific-east-asia-oceanic-fisheries-management-project>))
4. The limits in the column labeled "CMM 2008-01" do not apply to small island developing State members and participating Territories according to paragraph 34 of CMM 2008-01.
5. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 5 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
6. Reference to the level of "*less than 2,000 tonnes*" mentioned in CMM-2008-01 paragraph 32 has been assumed to mean that fisheries taking less than 2,000 t. of yellowfin should not exceed 2,000 t. of yellowfin.
7. Unclassified Indonesian catches of yellowfin in 2004 are considerably reduced because these catches were attributed to other gear types, mainly purse seine. This may suggest that unclassified catches prior to 2004 also contain large components by purse seine.
8. French Polynesia 'pole-and-line' catches include the *bonitier* and *poti marara* fleets; both use various gear types (pole-and-line, troll, handline, harpoon, gill net).
9. Japan purse seine is north of 20°N.
10. A certain component of the Philippines catches listed in this table occur in Archipelagic Waters , but can not be separated from total Conventional Area Annual Catch Estimates at this stage.
11. The provision of estimates of fishing effort for 2009, 2010 and 2011, according of Para. 39 of CMM 2008-01, is only available for Japan purse-seine fishery at this stage.
12. Indonesia yellowfin tuna catch excludes catches in Archipelagic waters.

**Table 6. Reported longline catches (metric tonnes) of yellowfin tuna in the WCPFC-CA, by flag.**

**Notes:**

1. Source: WCFPC Annual catch estimates as at 17th July 2013 (2012 data are provisional).
2. Catch estimates in **red** have been carried over from previous years.
3. Indonesia and Philippines have recently revised their estimates (see the respective Annual Catch Estimate Workshop reports at (<http://www.wcpfc.int/west-pacific-east-asia-oceanic-fisheries-management-project>))
4. The limits in the column labeled "CMM 2008-01 - 2010 limits" do not apply to small island developing State members and participating Territories according to paragraph 6 of CMM 2008-01.
5. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
  
6. Estimates include archipelagic water catches which for some countries cannot be separated at this stage (e.g. Philippines).
7. The catch limit set for Belize prior to 2009 is retained for 2009, according to WCFPC6 Report (Para. 27)
8. Senegal committed to limiting its fishing activities in the WCPF Convention Area to one longline vessel - WCFPC5 Report (Para. 44)
9. The Vietnam longline fleet are understood to fish outside the WCFPC Convention Area (South China Sea).
10. Catches by the Chinese longline fleet in the Kiribati EEZ are included in the estimates.
11. Catches by chartered Chinese, Korean and Chinese-Taipei longline vessels licensed to fish in Solomon Islands waters have been attributed to the Solomon Islands for 2010 and 2011.
12. Does not yet cover development of new fisheries in the waters of small-island developing states (e.g. Tokelau)
13. Indonesia yellowfin tuna catch excludes catches in Archipelagic waters.
14. Reference to the level of "*less than 2,000 tonnes*" mentioned in CMM-2008-01 paragraph 32 has been interpreted to mean that fisheries taking less than 2,000 t. of yellowfin should not exceed 2,000 t. of yellowfin.

**Table 7. Purse seine effort in the tropical WCPFC Convention Area (20°N-20°S), 2010–2012, by EEZ/High seas areas**

	TROPICAL PURSE SEINE EFFORT								
	2010			2011			2012

Notes

1. Excludes the Philippines, Indonesian and Vietnam domestic fisheries
2. 2012 data are provisional
3. The breakdown of Effort (sets) by Archipelagic waters requires operational data which have NOT been provided for several key fleets. As a consequence, these estimates should be considered as provisional until such time as complete operational data have been provided for ALL fleets.

## NOTES

1. The unit of effort in the Longline fishery is an estimate of thousands of HOOKS, based on the best available AGGREGATE DATA.
2. 2012 data are provisional
3. The effort data presented here have been provided as aggregate data which may be independent to the Annual catch estimates presented in Table 8.
4. Effort for the Japanese Coastal, Indonesian domestic, Philippines domestic and Vietnam fleets have been estimated from annual catch estimates and average tuna CPUE for fleets fishing in the vicinity to where these fleets are based. These estimates should be considered as very provisional in the absence of aggregate data for these fleets.
5. Note that aggregate data are not available for some fleets so their effort cannot be represented here (e.g. Nauru, Portugal and Wallis and Futuna)
6. The estimates of EFFORT may not yet reflect the complete attribution of EFFORT for chartered vessels.

**NOTES**

1. The catch estimates presented here have been provided as Annual catch estimates which may be independent to the effort estimates (provide from aggregate data) presented in Table 8.
2. Catch represents the sum of albacore tuna, bigeye tuna and yellowfin tuna.

**Table 10. Summarised catch and effort estimates by Year, Area and fleet combinations for tropical fisheries in the WCPFC Convention Area, 2000-2012**

Category	2000	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012

8. Effort by FOREIGN longline fleets in EEZs	179,370	219,954	217,755	257,864	220,767	210,618	236,312	242,920	249,984	276,607	302,032	337,420	377,388
9. Bigeye tuna catch by longline fleets in the high seas and non-PICT EEZs	43,161	37,524	54,813	40,224	56,531	39,672	42,665	39,185	34,466	34,673	30,459	27,520	27,162
10. Effort by longline fleets in the high seas and non-PICT EEZs	131,571	175,972	243,104	156,727	164,515	151,938	114,836	143,371	123,123	157,314	45,509	65,697	71,593

**NOTES**

1. Covers the WCPFC Convention area, 20N-20S.
2. EEZs represent the Pacific Island countries (PICs) EEZs within the WCPFC Convention Area, 20N-20S
3. Excludes Archipelagic waters catches. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
4. Excludes catch/effort from the Philippines, Indonesian and Vietnam domestic fleets
5. The unit of effort in the Longline fishery is an estimate of thousands of HOOKS.
6. The breakdown of annual catch and effort by EEZ requires operational data, or the provision of Annual catch and effort estimates by EEZ/high seas areas, neither of which have been provided for several key fleets. As a consequence, these estimates should be considered as very provisional until such time as complete operational data and/or annual catch estimates by EEZ have been provided for **ALL** fleets.
7. Total catch for the purse seine gear covers skipjack tuna, yellowfin tuna and bigeye tuna.

**Table 11. Estimated FAD sets undertaken in the tropical purse seine fishery of the WCPFC Convention Area (20°N-20°S), by flag, 2001-2012.**

**Notes**

1. Covers Drifting FAD, Log and Anchored FAD sets
2. Excludes archipelagic waters. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
3. Includes high seas
4. Excludes Vietnam domestic fleet
5. Complete information from Indonesia and Philippines are not available.
6. "CMM 2012-01 – ATTACH. A" refers to the limits established at WCPFC9 included in the CMM 2012-01 ATTACHMENT A. These limits were established with data that INCLUDED effort in archipelagic waters.
7. "CMM 2012-01 limits" have been set according to CMM 2012-01 para 11. applied to the latest data available which EXCLUDE effort in the archipelagic waters. Differences with "CMM 2012-01 -- ATTACH. A" may also be due to new data receipts since WCPFC9.

**Notes**

1. Covers Drifting FAD, Log and Anchored FAD sets
2. Excludes archipelagic waters. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
3. Includes high seas
4. Excludes Vietnam domestic fleet
5. All tuna catch estimates for Indonesia and Philippines domestic fisheries are assumed to be from FAD sets. Archipelagic waters catches are excluded.

**Table 13. Estimated total BIGEYE tuna catch from FAD sets undertaken in the tropical purse seine fishery of the WCPFC Convention Area (20°N-20°S), by flag, 2001-2012.**

**Notes**

1. Estimation methodology is preliminary
2. Covers Drifting FAD, Log and Anchored FAD sets
3. Excludes archipelagic waters. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
4. Excludes high seas
5. Excludes Vietnam domestic fleet
6. All bigeye tuna catch estimates for Indonesia and Philippines domestic fisheries are assumed to be from FAD sets. Archipelagic waters catches are excluded.

**Table 14. Number of associated (ASS) and unassociated (UNA) sets made in the WCPFC tropical purse seine fishery, 2000 – 2012.**

2010	37,572	13,042	596	35,884	10,940	503
2011	29,666	21,659	494	26,918	18,461	272
2012	34,667	20,300	546	30,632	17,552	341

**Notes**

1. Estimating the Effort (sets) excluding Archipelagic waters requires operational data which have not been provided for several key fleets. As a consequence, the estimates excluding archipelagic waters should be considered as provisional until such time as complete operational data have been provided for ALL fleets.
2. Covers the WCPFC Convention area between 20N-20S
3. Excludes the domestic fisheries of Indonesia, Philippines and Vietnam
4. “Associated” covers Drifting Logs, Drifting FADs and Anchored FADs only (excludes Live Whale and Live Whale shark associations)

**Notes**

1. Summaries represent the best estimates of catch by species, year and EEZ/high seas area at this time.
2. Estimates of species composition have been determined from observer data adjusted for sampling selectivity bias; further work on species composition estimates is expected in the coming year which will result in refinement of these estimates.
3. Estimating CATCH for high seas/EEZs requires operational data which have not been provided for several key fleets. As a consequence, the estimates excluding archipelagic waters should be considered as provisional until such time as complete operational data have been provided for ALL fleets.
4. Estimates are for the WCPFC Area tropical purse seine fishery only (20°N-20°S)
5. Estimates exclude the domestic Indonesian and Philippine tuna fisheries.

**Table 17. Annual catch estimates (% species composition) by EEZ/high seas area and tuna species in the tropical purse seine fishery of the WCPFC Convention Area (refer to Table 16 notes)**
