SMALL WORKING GROUP
DATA SUMMARIES FOR DISCUSSIONS
ON THE CMM FOR TROPICAL TUNAS

WCPFC10-2013-31
2 December 2013

The following data summaries were requested by the Small Working Group convened to discuss the CMM for tropical tunas on the 2nd December 2013.

The following summaries are available in WCPFC10 Meeting papers and have been reproduced here to facilitate reference during the discussions of the small working group.

- **MEETING PAPER -- [WCPFC10-2013-12 : TABLE 3](#)**
- **MEETING PAPER -- [WCPFC10-2013-12 : TABLE 6](#)**
- **MEETING PAPER -- [WCPFC10-2013-12 : TABLE 11](#)**
- **MEETING PAPER -- [WCPFC10-2013-12 : TABLE 15](#)**

The following summaries from WCPFC10 Meeting papers were updated accordingly to small working group requests.

- **MEETING PAPER -- [WCPFC10-2013-28 : TABLE 3 \(revised\)](#)**

Revised with additional baseline years at the request of the US delegation and two additional purse seine and longline scenarios added at the request of the EU delegation.

The last table shows the FAD SET LIMITS for 2014 and 2015-2016, as requested by the small working group, which is based on summarised data in WCPFC10-2013-12.

TABLE 3 -- Notes:

1. Source: WCFPC Annual catch estimates as at 17th July 2013 (2012 data are provisional).
2. Catch estimates in **red** have been carried over from previous years.
3. Indonesia and Philippines have recently revised their estimates in recent years. (see the respective Annual Catch Estimate Workshop reports at (<http://www.wcpfc.int/west-pacific-east-asia-oceanic-fisheries-management-project>))
4. The limits in the column labeled "CMM 2008-01 - 2010 limits" and "CMM 2012-01 limits" do not apply to small island developing State members and participating Territories according to paragraph 34 of CMM 2008-01 and CMM 2012-01.
5. Catches and effort of vessels operating under charters and similar arrangements have been attributed to host island states or territories in accordance with paragraph 2 of CMM 2008-01 using the best information available to SPC-OFP. However, in several cases, catches have not yet been attributed to the CCM responsible for the "charter or similar arrangements" since the flag state CCM has yet to advise that it has excluded these catches from their data (and thereby avoid double-counting).
6. The year 2004 shall apply to China, the United States and Indonesia. (CMM 2008-01 Footnote 3).
7. Attachment F in the CMM 2008-01 (BASELINE LONGLINE BIGEYE TUNA CATCHES, BY FLAG) represents the bigeye catch estimates available at the time of establishing CMM 2008-01.
8. Estimates include archipelagic water catches which for some countries cannot be separated at this stage (e.g. Philippines).
9. For China, Para 36 overrides the reduction in catches listed in Para 33 in regards to 2009 and 2010 limits.
10. The catch limits established at 2,000t prior to 2010, remain at the level of 2,000t. (according to CMM 2008-01 Para. 32)
11. The catch limits reduced by 20% for 2010 that fall below 2,000t. are to be set at 2,000t. (Para. 38)
12. The catch limit set for Belize prior to 2009 is retained for 2009, according to WCFPC6 Report (Para. 27)
13. Senegal committed to limiting its fishing activities in the WCPF Convention Area to one longline vessel - WCFPC5 Report (Para. 44)
14. The Vietnam longline fleet are understood to fish outside the WCFPC Convention Area (South China Sea).
15. Catches by the Chinese longline fleet in the Kiribati EEZ are included in the estimates.
16. Catches by chartered Chinese, Korean and Chinese-Taipei longline vessels licensed to fish in Solomon Islands waters have been attributed to the Solomon Islands for 2010 and 2011.
17. Para 35 applies to the US so the limit for 2010 will be a 10% reduction of the 2004 baseline catch in Attachment F.
18. Does not yet cover development of new fisheries in the waters of small-island developing states (e.g. Tokelau)
19. Indonesia bigeye tuna catch excludes catches in Archipelagic waters.
20. Korea and Chinese Taipei will voluntarily restrict its catch level at 2% less than the catch limits specified here in 2013.

Notes

1. Covers Drifting FAD, Log and Anchored FAD sets
2. Excludes archipelagic waters. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
3. Includes high seas
4. Excludes Vietnam domestic fleet
5. Complete information from Indonesia and Philippines are not available.

Notes

1. Estimating the Effort (sets) excluding Archipelagic waters requires operational data which have not been provided for several key fleets. As a consequence, the estimates excluding archipelagic waters should be considered as provisional until such time as complete operational data have been provided for ALL fleets.
2. Covers the WCPFC Convention area between 20N-20S
3. Excludes archipelagic waters. Fleets from Indonesia, Papua New Guinea, Philippines (distant-water), Philippines (domestic) and Solomon Islands in this list are normally the only fleets active in archipelagic waters.
4. Excludes the domestic fisheries of Indonesia, Philippines and Vietnam

Assumptions made:

- No rolling average included within FAD set limit calculations (i.e. based on 2010-2012 total set average throughout)
- FAD set fishing outside closure period was assumed comparable to recent years
- FAD closure evaluated as reductions in monthly FAD sets based on 2010-2012 average
- Chair's draft fixed set SIDS allocation distributed equally between SIDS nations
- High seas effort level assumed for the joint draft at around 2,190 days
- High seas FAD sets calculated based on allowed days by flag and flag-specific average FAD sets per day (2000-2008)

FAD SET LIMITS for 2014 and 2015-2016 under specific draft CMM options, as requested by the small working group, based on summarised data in WCPFC10-2013-12.
