**Proposal by the United States of America to the  
Thirteenth Regular Session of the Western and Central Pacific Fisheries Commission**

~~4 November~~ 5 December 2016

**Introductory Note**

At WCPFC12 the Commission approved a list of Convention provisions and conservation and management measures to be reviewed through the Compliance Monitoring Scheme in 2016-2018 (WCPFC12 Summary Report Attachment O, Tables 2-4) and a frequency of assessment for 2016 and beyond (WCPFC12 Summary Report Attachment O, Table 1). The Commission noted that this list would need to be revised as appropriate in the following years to take into account conservation and management measures that are adopted or revised.

TCC12 considered suggestions and questions from the Secretariat on the list of obligations to be assessed in 2016-2018 (TCC12-10B), and:

*TCC12 agreed that CCMs wishing to provide any information or comments on the Secretariat's suggested list of obligations to be assessed, as outlined in Annex I and summarized in Table 2 of WCPFC-TCC12-2016-10B, or to suggest additional obligations to the existing list of obligations to be assessed, as outlined in WCPFC12 Summary Report Attachment O, will provide them to the USA by 21 October 2016. The USA will revise WCPFC-TCC12-2016-10B for distribution by 5 November 2016 for consideration by WCPFC13.*

Since TCC12, the United States received and considered comments from three CCMs; – Chinese Taipei, Japan, and New Zealand. Chinese Taipei offered several clarifications to table and paragraph numbering that were incorporated and all other comments were accommodated in this proposal except as described below.

Japan had a suggestion regarding CMM paragraphs that might benefit from further TCC advice and direction (Table 1 in WCPFC-TCC12-2016-10B). That is an issue beyond the scope of this undertaking so we did not address the comment in this proposal. Also, Japan suggested that paragraph 6 of CMM 2010-07, on sharks, be assessed in both 2017 and 2018—that is, assessing that CMM every year rather than every two years. The United States has not proposed that change here but is open to discussing it.

New Zealand recommended that all CMMs that are amended be automatically scheduled for review during the first TCC session that occurs after the amendment. The only such amended CMM relevant for review in 2016-2018 (i.e., those scheduled to be reviewed less often than every year) is the seabird measure, and we have shifted its review schedule in this proposal accordingly. We highlight here New Zealand's broader proposal for the Commission to consider when it updates the assessment schedule for future years.

The United States has questions about the deletions identified in footnote 1. First, the small working group on CNMs is evaluating the applications of non-members not their compliance, so it is not clear why the work of that group would be duplicative of a CMS review. Further, we do not see CMM 2009-09 on vessels without nationality as being redundant with the IUU measure: paragraph 5 is a separate obligation. Similarly, the CMM 2012-03 obligation is not redundant to the main ROP measure: paragraph 2 is a specific obligation. Finally, the IUU measure, CMM 2010-06, does have an obligation under paragraph 22 – it may be not applicable to most CCMs most years, but it is an important obligation when the circumstances come up so we do want to capture it somehow. The United States has inserted these additions to the List of Obligations for these CMMs for further consideration.

This proposal to update the list of obligations to be assessed in 2016-2018 (Tables 2-4) and the frequency of assessment (Table 1) builds on the Secretariat's suggestions in WCPFC-TCC12-2016-10B, which are highlighted in yellow. Subsequent proposed revisions are highlighted as tracked-changes.
