SIXTH REGULAR SESSION**

Nuku'alofa, Tonga
10-19 August 2010

ESTIMATES OF ANNUAL CATCHES IN THE WCPFC STATISTICAL AREA

WCPFC-SC6-2010/ST IP-1

Paper prepared by

Oceanic Fisheries Programme (OFP)
Secretariat of the Pacific Community (SPC)
Noumea, New Caledonia

INTRODUCTION

Estimates of annual catches in the WCPFC Statistical Area (Figure 1) are presented for target tuna species, i.e., albacore (*Thunnus alalunga*) bigeye (*Thunnus obesus*), skipjack (*Katsuwonus pelamis*) and yellowfin (*Thunnus albacares*), and major billfish species, i.e., black marlin (*Makaira indica*), blue marlin (*Makaira mazara*), striped marlin (*Tetrapturus audax*) and swordfish (*Xiphias gladius*). Estimates of catches of southern bluefin tuna (*Thunnus maccoyii*), which are compiled by the Commission for the Conservation of Southern Bluefin Tuna (CCSBT). The compilation of estimates of catches of Pacific bluefin tuna (*Thunnus orientalis*) commenced only recently and will be presented in future editions of this report once the gaps in the provision of historical catch estimates for this species have been resolved. Recent catches of tuna in the domestic fisheries of Vietnam may have amounted to about 19,000 tonnes of skipjack, 18,000 tonnes of yellowfin and 5,500 tonnes of bigeye, for a total of 42,500 tonnes (Lewis 2005); however, these catches have been ignored in the tables and figures presented below at this stage.

TARGET TUNA SPECIES

Tables 1–3 and Figures 2 and 3 present estimates of annual catches of target tunas in the WCPFC Statistical Area. For the sources of the annual catch estimates, see Lawson (2008). For a breakdown of recent catch estimates by gear and flag, see OFP (2009). For discussion regarding trends, see Williams & Terawasi (2010). Estimates of purse-seine catches of bigeye and yellowfin that were not already adjusted for the misidentification of bigeye as yellowfin have been adjusted by the OFP (Lawson 2007).

Tables 4–7 present estimates of annual catches of target tunas in the WCPO Area and the EPO Area (Figure 1) by gear type. Tables 8–10 present estimates of annual catches of target tunas for the WCPO, the EPO and the Pacific Ocean by species. Table 11 and 12, and Figures 4 and 5, present global catches of target tunas, by species and ocean area respectively.

MAJOR BILLFISH SPECIES

Table 13 presents estimates of commercial catches of the four major billfish species by gear type. Table 14 and Figure 6 present estimates of the major billfish catches for all gear types combined. Tables 15 and 16 present estimates of commercial catches of striped marlin and swordfish in the WCPFC Statistical Area north and south of the equator respectively.
