

TECHNICAL AND COMPLIANCE COMMITTEE

Fourteenth Regular Session

26 September – 2 October 2018

Majuro, Republic of Marshall Islands

**Compiled information on Pacific bluefin tuna - fishing effort and catch
(26Aug2017)-Rev.01 (NC14-2018-WP02) –(NC14-2018/WP-02_Rev_2)**

WCPFC-TCC14-2018-IP-12_rev1

29 September 2018

**NORTHERN COMMITTEE
FOURTEENTH REGULAR SESSION**

Fukuoka, Japan
4-7 September 2018

**COMPILED INFORMATION ON PACIFIC BLUEFIN TUNA
(FISHING EFFORT AND CATCH)**

WCPFC-NC14-2018/WP-02 **(Rev.02)**

Note:

1. Fijian catch corrected; averages of 2002-2004 are inserted.

Secretariat

According to Paragraph 2-4 of the CMM 2017-08, fishing effort and catch of Pacific bluefin tuna are compiled based on Member's reports, which are annexed as Table 1 and 2, respectively.

2. *CCMs shall take measures necessary to ensure that:*
 - (1) *Total fishing effort by their vessel fishing for Pacific bluefin tuna in the area north of the 20° N shall stay below the 2002–2004 annual average levels.*
 - (2) *All catches of Pacific bluefin tuna less than 30 kg shall be reduced to 50% of the 2002–2004 annual average levels. Any overage of the catch limit shall be deducted from the catch limit for the following year.*
3. *CCMs shall take measures necessary to ensure that all catches of Pacific Bluefin tuna 30kg or larger shall not be increased from the 2002-2004 annual average levels¹. Any overage of the catch limit shall be deducted from the catch limit for the following year. However, in 2017, 2018, 2019, and 2020 CCMs may use part of the catch limit for Pacific bluefin tuna smaller than 30 kg stipulated in paragraph 2 (2) above to catch Pacific bluefin tuna 30 kg or larger in the same year. In this case, the amount of catch 30 kg or larger shall be counted against the catch limit for Pacific bluefin tuna smaller than 30 kg. CCMs shall not use the catch limit for Pacific bluefin tuna 30 kg or larger to catch Pacific bluefin tuna smaller than 30 kg. The ISC is requested to review, in its work referred to in Section 5 of Harvest Strategy, the implications of this special provision in terms of PBF mortality and stock rebuilding probabilities in 2020. Based on that review, in 2020 the Northern Committee will determine whether it should be continued past 2020, and if so, recommend changes to the CMM as appropriate.*
4. *CCMs shall report their 2002–2004 baseline fishing effort and <30 kg and >=30 kg catch levels for 2013 and 2014, by fishery, as referred to in paragraphs 2 and 3, to the Executive Director by 31 July 2015. CCMs shall also report to the Executive Director by 31 July each year their fishing effort and <30 kg and >=30 kg catch levels, by fishery, for the previous 3 year, accounting for all catches, including discards. The Executive Director will compile this information each year into an appropriate format for the use of the Northern Committee.*

The information in the Tables below will be modified subject to any further updates from Members.

¹ CCMs with a base line catch of 10 t or less may increase its catch as long as it does not exceed 10 t.

**Compiled Information on Pacific Bluefin Tuna
(Fishing Effort and Catch)**

³Catch limit for purse seine fishery is managed on a calendar year basis, while that for coastal fisheries is managed on a fishing year basis (1 July – 30 June). Catches on a fishing year basis is as follows.

- 1st management period (January 2015 – December 2015 for purse seine fishery, January 2015 – June 2016 for coastal fisheries)
 <30kg: 3,096t;
 ≥30kg: 3,871t
- 2nd management period (January 2016 – December 2016 for purse seine fishery, July 2016 – June 2017 for coastal fisheries)
 <30kg: 4,341t;
 ≥30kg: 4,368t
