Inter-American Tropical Tuna Commission

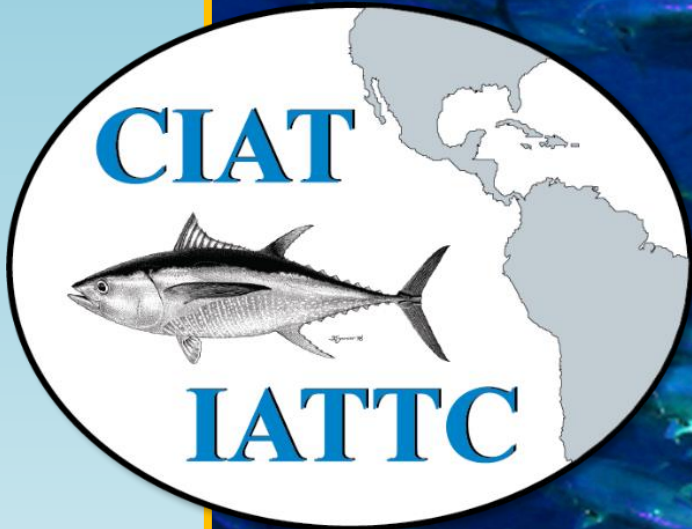

RECOMENDACIONES DEL PERSONAL STAFF RECOMMENDATIONS (IATTC-94-03)

94ª Reunión de la CIAT–94th Meeting of the IATTC
22-26 Jul 2019 - Bilbao, España–Spain

RECOMMENDATIONS:

1. The current resolution ([C-18-01](#)) is adequate and, for this reason, no additional recommendations are made.
2. Increased catches based on the scenarios analyzed are possible under the harvest strategy prepared by the joint tRFMO working group as described in [C-18-02](#). The choice of catch scenario should take into account the desired rebuilding rate and the distribution of catch between small and large bluefin.
