

**REGIONAL OBSERVER PROGRAMME INTERSESSIONAL WORKING GROUP**

**Eighth Meeting**

1 April 2026

Electronic Meeting

---

**USA COMMENTS ON CCFS PROCESS FLOW DISCUSSION PAPER  
AND THE UPDATED DRAFT SCOPE OF MONITORING FOR CCFS CASES**

---

**ROP-IWG08-2026-DP01**

**7 March 2026**

**Submitted by the United States of America**

### *Explanatory Note:*

The United States submitted for WCPFC22's consideration [WCPFC22-2025-DP15](#), "Challenges with Observer-Sourced Enforcement Referrals and Proposed Reforms to Strengthen the WCPFC Compliance Monitoring Scheme (CMS)." Although WCPFC22 was unable to discuss [WCPFC22-2025-DP15](#) in detail, WCPFC22 agreed to task the ROP IWG in 2026 to consider relevant issues raised in the paper for further resolution and to formulate a recommendation for action to TCC22.

As the April 2026 meeting of the ROP IWG will review proposals related to the Observer-CCFS process flow and Scope of Monitoring for CCFS cases, the United States notes that [WCPFC22-2025-DP15](#) contains suggested edits to both of those proposals. For ease of reference, the United States has excerpted from [WCPFC22-2025-DP15](#) the specific sections that relate to the CCFS-related proposals, and provided them in this document. A high-level overview of these sections is as follows:

#### **[A] [USA Comments on ROP-IWG08 Agenda Item 3.1: Observer–CCFS Process Flow](#)**

The United States provided detailed comments on the proposed Observer-CCFS Process Flow in [ROP-IWG08-2026-02](#) (formerly [WCPFC22-2025-IP04a rev01](#)), which were published as a section of [WCPFC22-2025-DP15](#) (pp.8–10, 21–27). The core comments are reproduced below and seek to:

- *Clarify Terminology*: Ensure consistent language is used throughout the process.
- *Define Terms*: Add necessary definitions for process steps and components.
- *Specify Responsible Parties*: Clearly delineate which entity is responsible for each action.
- *Harmonize with the Convention*: Ensure the procedural flow aligns with the requirements for compliance investigations outlined in Articles [23\(5\)](#) and [25\(2\)](#) of the [Convention](#) and obligations for sharing of observer evidence ([CMM 2018-05](#) at ¶ 11).

The proposed revisions were provided for review in the following Annexes, reproduced below:

- [Annex 1](#) presents the proposed changes in redline against the original [-IP04a](#) draft.
- [Annex 2](#) presents a clean proposed final version of the Observer–CCFS Process Flow.

#### **[B] [USA Comments on ROP-IWG08 Agenda Item 3.2: Scope of Monitoring for CCFS Cases](#)**

The United States provided detailed comments on the Draft Scope of Monitoring for CCFS Cases in [ROP-IWG08-2026-03](#) (formerly [WCPFC22-2025-IP04b](#)), which were published as a section of [WCPFC22-2025-DP15](#) (pp.10–15, 28–37). Key revisions are reproduced below and target:

- *Clarity & Enforceability*: Remove references to unenforceable Obligations.
- *Precision*: Retain and clarify Obligations that have only partial relevance to the ROP.
- *Completeness*: Include a few Obligations that were otherwise called into question.

The proposed revisions are provided for review in the following Annex, which is reproduced below:

- [Annex 4](#) presents a chart with the full text of each CMM obligations alongside feedback.

**A. USA Comments on ROP-IWG08 Agenda Item 3.1: CCFS Process Flow**

Regarding: [ROP-IWG08-2026-02](#) (formerly [WCPFC22-2025-IP04a](#) rev1)

See **Annex 1** (redline of proposed edits) and **Annex 2** (clean proposed final), below.

In [WCPFC22-2025-IP04a](#), the ROP-IWG proposed a process flow to streamline the transfer of information from observer reporting to the WCPFC Secretariat for inclusion in the CCFS. The U.S. supports the proposed process flow—particularly regarding its emphasis on the CCM-led creation of CCFS cases arising out of observer-sourced data (including the automatic provision of complete observer-sourced case packages upon notification under [Article 25\(2\)](#)<sup>1</sup> of the [Convention](#) and obligations for sharing of observer evidence ([CMM 2018-05](#) at ¶ 11<sup>2</sup>)) and its description of the debriefing and verification process for observer-alleged infringements.

The U.S. further recommends clarifying edits to the proposed steps, as summarized below<sup>3</sup> (**with additional language in step titles indicated in [blue-color with underline](#)**):

[**Step 1. Observer Data Source** [\(Trip Data\)](#)] Edits ensure the terminology used is consistent and accurate (e.g., eliminate any reference to “trip report,” which is undefined, and instead reference “**trip data**”), which will add clarity and help to streamline the proposed process flow.

[**Step 2. Data Transmission** [from Observer to Debriefing Observer Provider](#)] Edits ensure that terminology used is consistent and accurate (e.g., by introducing “**Debriefing Observer Provider**” as a defined term) and eliminating undefined acronyms.

[**Step 3. ROP Observer Debriefing Process** [\(WCPFC ROP Debriefing Questionnaire\)](#)] Edits add further detail to clarify *how* the debriefing process would be done using the newly proposed “**WCPFC ROP Debriefing Questionnaire**” (to be developed<sup>4</sup>), including by identifying the party or parties responsible for conducting each sub-step in the process and by specifying

---

<sup>1</sup> 2. Each member of the Commission shall, at the request of any other member, and when provided with the relevant information, investigate fully any alleged violation by fishing vessels flying its flag of the provisions of this Convention or any conservation and management measure adopted by the Commission. A report on the progress of the investigation, including details of any action taken or proposed to be taken in relation to the alleged violation, shall be provided to the member making the request and to the Commission as soon as practicable and in any case within two months of such request and a report on the outcome of the investigation shall be provided when the investigation is completed.

<sup>2</sup> 11. CCMs shall take advantage of the information collected by observers for the purpose of investigations under Convention Articles 23 and 25, and shall cooperate in the exchange of such information, including by proactively requesting, responding to, and facilitating the fulfilment of requests for, copies of observer reports in accordance with standards adopted by the Commission, as applicable.

<sup>3</sup> A “redline” version showing the ROP-IWG’s latest draft at the time of writing with the U.S.-proposed edits in tracked changes appears in **Annex 1**, *infra*, and a “clean” version showing the U.S. proposed final version of the Observer–CCFS Process Flow steps appears in **Annex 2**, *infra*.

<sup>4</sup> The United States is also interested to further discuss the details of the wording to be included in the WCPFC ROP Debriefing Questionnaire once the universe of CMM paragraph(s) for observer attention is finalized.

when and how supporting evidence should be identified and documented.

[[Step 4. Compliance Evaluation and Vetting](#) ([Infringement Notification Form](#)) and [Clearance of Scientific Data for Transmission to SPC](#)] Edits provide crucial clarification by identifying the party responsible for taking various actions in the vetting process, what specifically must be done in order to vet an Observer-Sourced allegation of an alleged infringement, and what specifically must be compiled/forwarded with any subsequent investigation request pursuant to Articles [23\(5\)](#) and [25\(2\)](#) of the Convention.

Specifically, the U.S. edits to [Step 4](#) would expand the suggested description of an “Observer-Sourced Case Package” to include *all* Observer-sourced trip data, whether or not the data is specifically relevant to a particular alleged infringement. As discussed during various ROP-IWG meetings and at TCC21, *complete* copies of reports are required by the U.S. and other members’ legal systems, with confidential information redacted as needed. For the United States, this is true even if only portions of the report will be used as evidence in domestic proceedings. The limitation on access to each CCFS case and using *redaction* technologies (rather than omitting pages) should be sufficient to mitigate observer providers’ concerns about uploading confidential observer information directly to the CCFS.

[[Step 5. Initiating CCM’s Formal Investigation Request](#) ([Observer-Sourced Case Package](#))] During TCC21, several CCMs noted that *all* CCFS cases should be Initiated by CCMs pursuant to [Convention](#) Articles [23\(5\)](#) and [25\(2\)](#) and paragraph 11 of [CMM 2018-05](#).<sup>5</sup> The United States agrees and endorses the substance of the ROP-IWG’s proposed process flow Step 5, but has offered edits to clarify the details by, for example, defining the relevant parties (e.g., Initiating CCMs, Responsible CCMs) and defining/describing the “**Observer-Sourced Case Package**” materials to be included with any subsequent investigation referral under the Convention. Moreover, suggested edits to the proposed process flow step aim to clarify who specifically is responsible for transmission of the Observer-Sourced Case Package

[[Step 6. WCPFC Secretariat CCFS Integration](#)] Edits clarify that supporting documentation for Observer-Sourced CCFS cases, as is true for all Inspection-Sourced CCFS cases, should be uploaded to the CCFS and/or attached to the initial referral communication, as contemplated under Articles [23\(5\)](#) and [25\(2\)](#) of the [Convention](#).

[[Step 7. Investigation of Alleged Infringements and Domestic Enforcement](#)] Finally, edits proposed to process flow Step 7 clarify the order of actions and responsible parties for investigations into observer-sourced allegations of alleged infringements and, if applicable, their subsequent domestic prosecution.

As noted, a “redline” version of the draft proposed process flow incorporating the USA’s suggested line edits appears in **Annex 1, *infra***, and a “clean” version of the draft proposed process flow incorporating the above-summarized comments appears in **Annex 2, *infra***.

---

<sup>5</sup> See, e.g., [WCPFC-TCC21-2025-TCC21 DRAFT ¶¶ 211 & 213](#) (Draft Summary Report)

**ANNEX 1: USA Proposed “Redline” Edits to ROP-IWG’s**  
**Working Draft Observer–CCFS Process Flow (from pp. 4–5 of [WCPFC22-2025-IP04a rev1](#))**

Notes:

**1. Observer Data Source**

- Observer disembarks
- Once the observer disembarks in port (home or foreign) the trip ~~data~~~~report~~ is expected to be 90% complete
- Observer will notify [the observer’s national](#) observer provider to arrange for debrief and repatriation.

*CMM (agreed minimum standards and guides of ROPs) Standard requirement - IWGROP2/TCC4/WCPFC5*

*Note that the requirements set out in [CMM 2017-03](#) Conservation and Management Measure for the protection of WCPFC Regional Observer Programme Observers would also apply to matters related to the health, safety and welfare of observers.*

**2. Data transmission [from Observer to Debriefing Observer Provider](#)**

- Observer provides trip data either through hard copy in port or ~~by ER processes~~[electronically \(e.g., the observer – ER database\) to the to the Debriefing Observer Provider.](#)

*~~Note~~~~It is recognized~~ that within the Pacific Islands region, there are often existing arrangements that facilitate an observer being debriefed by an ~~other~~ [Observer Provider](#) ~~other than the observer’s national observer provider~~. For example, SBOB on POA trip is debriefed by PGOB debriefer.*

**3. ROP Observer Debriefing Process [\(WCPFC ROP Debriefing Questionnaire\)](#)**

- Observer [trip data for each ROP Trip](#) is debriefed by an Observer Provider CCM, [Observer Provider](#) Coastal State, or other designated [Observer Provider](#) CCM [\(the “Debriefing Observer Provider” or “debriefing”\)](#).
- Debriefing will be conducted [in line with the WCPFC ROP Agreed Minimum Standards and Guidelines, as updated in 2023.](#)
- [Debriefing will prioritize any potential infringements ~~against from~~ the agreed-upon listed of CMMs’ paragraphs identified ~~throughin~~ a “WCPFC ROP Debriefing Questionnaire”s \(to be developed\), ~~to facilitate completing the WCPFC Observer Trip Monitoring Summary Form~~](#)
- [The observer will draft initial responses to the WCPFC ROP Debriefing Questionnaire, after which a debriefer will review and verify the Questionnaire.](#)

- If on the WCPFC ROP Debriefing Questionnaire, the debriefer/Observer gives a “YES” to indicate an alleged infringement in of any or all of the agreed/listed CMMs paragraphs in the WCPFC ROP Debriefing Questionnaires, the debriefer will “verify” that “YES” by compiling the relevant that form-supporting with observer-sourced evidence (e.g., photos, /videos, /written statements), labeling the evidence to indicate the corresponding CMM paragraph(s), and attaching the evidence to the WCPFC ROP Debriefing Questionnaire.
- When all “YES” responses have been verified (or if there are only “NO” responses), the debriefer is then passed on a signed copy of the WCPFC ROP Debriefing Questionnaire (including all attached evidence) to the designated CCM’s personnel/contacts in Step 4 to verify and validate the debriefers’ potential compliance summary report generated from the Debriefing questionnaires.
- ~~If a “NO” is attained from the Debriefing questionnaire on the listed CMMs paragraphs, the trip data is cleared and send to SPC for scientific purposes and archiving.~~

#### 4. Compliance Evaluation and Vetting (Infringement Notification Form) and Clearance of Scientific Data for Transmission to SPC (Trip Data)

- The CCM-designated vetting person al/contact (“Vetter”) will review the debriefer’s report verified WCPFC ROP Debriefing Questionnaire (with supporting evidence) and evaluate whether potential infringements indicated in it are established to be genuine and supported by observer-sourced evidence.
- If the Vetter establishes that one or more potential infringements is genuine with supporting evidence, the Vetter will complete an “Infringement Notification Form/Report” (to be developed); if potential infringements indicated in the debriefers report are established to be genuine with supporting evidence/information obtained from the observer report.
- At this step, a full “Observer-Sourced Case Package” is compiled with the following details:
  1. An Infringement Notification Form/~~Report~~ outlining the
    - (a) Vessel and Trip Details,
    - (b) Infringement Descriptions (Date/Time, Location, Set/Species, etc)
    - (c) Compliance Analysis
    - (d) Recommendation for Flag/Coastal state investigations
  2. A signed and verified WCPFC ROP Debriefing Questionnaire with all Ssupporting eEvidence (e.g., photos, videos, written statements photo/video);
  - 2.3. All other trip data, ,observer statement or crew statement, including

~~relevant~~ every page of all observer reports forms, whether or not each page contains information specific to a particular alleged infringement. If any information is deemed to be confidential, the Vetter may “redact” it, as required by data confidentiality rules.

The Vetter will then transmit a full “Observer-Sourced Case Package” to the “Initiating CCM” (Observer Provider CCM, Coastal State CCM, or other designated CCM responsible for debriefing and compliance evaluation). ~~These details will be then for~~ used under CMM 2018-05 paragraph 11, to trigger an Article 23(5) or Article 25(2) CCM request in **Step 5** for investigations ~~by the flag state responsible and the Coastal state that the infringement occurred.~~

- If the ~~compliance evaluation carried out is NO CASE~~ Vetter does not establish that there are any genuine potential infringements, due to insufficient observer information and or evidence, the ~~trip~~ data is ~~given a~~ CLEARED ~~authenticity on the WCPFC Debriefers Report Form~~ and submitted to SPC ~~for scientific purposes and archiving.~~

## 5. Initiating CCM’s Formal Investigation Request (Observer-Sourced Case Package)

- The “Initiating CCM” (Observer Provider CCM, Coastal State CCM, or other designated CCM responsible for debriefing and compliance evaluation), submits a formal request to the “Responsible CCM(s)” (Flag CCM(s) and/or any ~~including the~~ Coastal State CCM(s) with potential jurisdiction over the alleged infringement), to investigate the alleged ~~ed~~ ation(s) violation.
- ~~The formal request will,~~ include the full Observer-Sourced Case Package, as outlined in **Step 4**. Note that there will no longer be any need for Responsible CCMs to “request” observer reports, because no alleged infringements will be notified without being accompanied by supporting documentation.
- ~~The~~ Initiating CCM transmits its formal request ~~is transmitted~~ via email to the Responsible CCM(s), attaching the full Observer-Sourced Case Package (as outlined in Step 4) and copying the WCPFC Secretariat for CCFS integration (as discussed in Step 6).
- ~~The flag CMM initiates a full investigation and provides progress reports within two months, per Article 25(2).~~

## 6. WCPFC Secretariat CCFS Integration

- ~~When Upon~~ receiving ~~pt of~~ a copy of the Initiating CCM’s formal investigation request, the Secretariat entered ~~ed~~ the case into the CCFS, creating a “Case ID” and attaching all supporting documentation (including the email communication and the full Observer-Sourced Case Package) for tracking and centralized record-keeping ~~of the case until it is close.~~
- The investigation outcomes and data from this process and through the CCFS are then

considered in the CMS process for inclusion in the CMR, ensuring timely and accurate compliance assessments.

7. **Investigation of Alleged Infringements and Domestic Enforcement** ~~Flag CCM and other parties act on notification of a potential infringement and investigate, prosecute, and penalize proven infringements in accordance with national laws~~

- ~~The flag-~~ Responsible CCM(s) act on the Initiating CCM's notification via its Formal Investigation Request (described in Step 6) by initiating~~initiates~~ a full investigation.
- The Responsible CCM(s)~~and~~ provides through the CCFS progress reports within two months of the initial notification (and within two months of any request for an update thereafter), per Article 25(2) of the Convention~~through the CCFS~~.
- Responsible CCM(s) prosecute and penalize proven infringements, in accordance with domestic law.

**ANNEX 2: Proposed “Clean” Working Draft Observer–CCFS Process Flow**  
**from pp. 4–5 of [WCPFC22-2025-IP04a rev1](#) (incorporating USA edits described above)**

Notes:

**1. Observer Data Source**

- Observer disembarks
- Once the observer disembarks in port (home or foreign) the trip data is expected to be 90% complete
- Observer will notify the observer’s national observer provider to arrange for debrief and repatriation.

*CMM (agreed minimum standards and guides of ROPs) Standard requirement - IWGROP2/TCC4/WCPFC5*

*Note that the requirements set out in [CMM 2017-03](#) Conservation and Management Measure for the protection of WCPFC Regional Observer Programme Observers would also apply to matters related to the health, safety and welfare of observers.*

**2. Data transmission from Observer to Debriefing Observer Provider**

- Observer provides trip data either through hard copy in port or electronically (e.g., the observer – ER database) to the Debriefing Observer Provider.

*Note that within the Pacific Islands region, there are often existing arrangements that facilitate an observer being debriefed by an Observer Provider other than the observer’s national observer provider. For example, SBOB on POA trip is debriefed by PGOB debriefer.*

**3. ROP Observer Debriefing Process (WCPFC ROP Debriefing Questionnaire)**

- Observer trip data for each ROP Trip is debriefed by an Observer Provider CCM, Observer Provider Coastal State, or other designated Observer Provider CCM (the “Debriefing Observer Provider” or “debriefing”).
- Debriefing will be conducted in line with the WCPFC ROP Agreed Minimum Standards and Guidelines, as updated in 2023.
- Debriefing will prioritize any potential infringements from the agreed-upon list of CMMs’ paragraphs identified in a “WCPFC ROP Debriefing Questionnaire” (*to be developed*).
- The observer will draft initial responses to the WCPFC ROP Debriefing Questionnaire, after which a debriefer will review and verify the Questionnaire.
- If on the WCPFC ROP Debriefing Questionnaire, the Observer gives a “YES” to indicate an alleged infringement of any or all of the agreed/listed CMM paragraphs, the debriefer will “verify” that “YES” by compiling the relevant supporting observer-sourced evidence (e.g., photos, videos, written statements), labeling the evidence to

indicate the corresponding CMM paragraph(s), and attaching the evidence to the WCPFC ROP Debriefing Questionnaire.

- When all “YES” responses have been verified (or if there are only “NO” responses), the debriefer then passes on a signed copy of the WCPFC ROP Debriefing Questionnaire (including all attached evidence) to the **designated CCM’s personnel/contacts** in **Step 4**.

#### **4. Compliance Evaluation and Vetting (Infringement Notification Form) and Clearance of Scientific Data for Transmission to SPC (Trip Data)**

- The CCM-designated vetting person/contact (“Vetter”) will review the debriefer’s verified WCPFC ROP Debriefing Questionnaire (with supporting evidence) and evaluate whether potential infringements indicated in it are established to be genuine and supported by observer-sourced evidence.
- If the Vetter establishes that one or more potential infringements is genuine with supporting evidence, the Vetter will complete an “Infringement Notification Form” (*to be developed*). At this step, a full “Observer-Sourced Case Package” is compiled with the following details:
  1. An Infringement Notification Form outlining the
    - (a) Vessel and Trip Details,
    - (b) Infringement Descriptions (Date/Time, Location, Set/Species, etc)
    - (c) Compliance Analysis
    - (d) Recommendation for Flag/Coastal state investigations
  2. A signed and verified WCPFC ROP Debriefing Questionnaire with all supporting evidence (e.g., photos, videos, written statements photo/video);
  3. All other trip data, including every page of all observer report forms, whether or not each page contains information specific to a particular alleged infringement. If any information is deemed to be confidential, the Vetter may “redact” it, as required by data confidentiality rules.
- The Vetter will then transmit a full “Observer-Sourced Case Package” to the “Initiating CCM” (Observer Provider CCM, Coastal State CCM, or other designated CCM responsible for debriefing and compliance evaluation) for use under CMM 2018-05 paragraph 11, to trigger an Article 23(5) or Article 25(2) CCM request in **Step 5** for investigations. If the Vetter does not establish that there are any genuine potential infringements, due to insufficient observer information and or evidence, the trip data is CLEARED and submitted to SPC for scientific purposes and archiving.

#### **5. Initiating CCM’s Formal Investigation Request (Observer-Sourced Case Package)**

- The “Initiating CCM” (Observer Provider CCM, Coastal State CCM, or other designated CCM responsible for debriefing and compliance evaluation), submits a

formal request to the “Responsible CCM(s)” (Flag CCM(s) and/or any Coastal State CCM(s) with potential jurisdiction over the alleged infringement) to investigate the allegation(s).

- The formal request will include the full Observer-Sourced Case Package, as outlined in **Step 4**. *Note that there will no longer be any need for Responsible CCMs to “request” observer reports, because no alleged infringements will be notified without being accompanied by supporting documentation.*
- The Initiating CCM transmits its formal request via email to the Responsible CCM(s), attaching the full Observer-Sourced Case Package (as outlined in **Step 4**) and copying the WCPFC Secretariat for CCFS integration (as discussed in **Step 6**).

## **6. WCPFC Secretariat CCFS Integration**

- Upon receipt of a copy of the Initiating CCM’s formal investigation request, the Secretariat enters the case into the CCFS, creating a “Case ID” and attaching all supporting documentation (including the email communication and the full Observer-Sourced Case Package) for tracking and centralized record-keeping.
- The investigation outcomes and data from this process and through the CCFS are then considered in the CMS process for inclusion in the CMR, ensuring timely and accurate compliance assessments.

*Note that if the WCPFC eventually creates a “ROP Portal” (similar to the recently implemented “HSBI Portal”), then an Initiating CCM in **Step 5** would also create a CCFS case in the ROP Portal and upload the Observer-Sourced Case Package described in **Step 4**, and **Step 6** would be comprised of the Secretariat’s review of the ROP-Portal entry to finalize the creation of a case in CCFS for tracking and centralized record-keeping purposes.*

## **7. Investigation of Alleged Infringements and Domestic Enforcement**

- The Responsible CCM(s) act on the Initiating CCM’s notification via its Formal Investigation Request (described in **Step 6**) by initiating a full investigation.
- The Responsible CCM(s) provide through the CCFS progress reports within two months of the initial notification (and within two months of any request for an update thereafter), per Article 25(2) of the Convention.
- Responsible CCM(s) prosecute and penalize proven infringements, in accordance with domestic law.

**B. USA Comments on ROP-IWG08 Agenda Item 3.2: Scope of Monitoring**

Regarding: [ROP-IWG08-2026-03](#) (formerly [WCPFC22-2025-IP04b](#))

See **Annex 4** (redline of U.S. edits to the table in [-IP04 at pp. 10–32](#)), below.

In [WCPFC22-2025-IP04b](#), the ROP-IWG proposed updates to the ROP Minimum Standard Data Fields (**MSDFs**) and other areas of the ROP data forms to add or revise fields for better monitoring of CMMs and improving ROP data integration into the CCFS.

The U.S. has provided comments on which WCPFC obligations are appropriate for monitoring by human observers with the ROP-IWG, and a summary of those comments appears below, with an abbreviated and annotated “redline” version of the table on [PDF pages 10–32 of WCPFC22-2025-IP04b](#) with U.S. and PNA+ comments, is provided in [Annex 4, infra](#).

The U.S. also submitted to the ROP-IWG a revised Summary of Obligations and Proposed Case-Type Identifiers for Observer-Sourced CCFS Cases, updated from the version appearing on [PDF pages 8–9 of WCPFC22-2025-IP04b](#), to reflect these recommendations. That table is also reproduced below in redline, under sub-paragraph (B)(ii).

*i. Summary of the U.S.’s Substantive Comments regarding [pp. 10–32 of WCPFC22-2025-IP04b](#) (see **Annex 4** for U.S. edits in redline)*

The U.S. is proposing to remove or edit specific CMM paragraphs from the formal list of obligations for inclusion in the WCPFC ROP Debriefing Questionnaire’s list of possible CCFS/enforcement referral topics when the obligations are considered to be mere suggestions, are unenforceable, or are otherwise inappropriate for compliance assessments. Those recommendations are summarized below.

- Removal of Obligations Deemed to be Suggestions/Guidance. The U.S. is proposing to remove or edit the following specific CMM paragraphs from the Questionnaire because the obligations (in whole or in part) are considered to be mere suggestions that are not binding on CCMs or their vessels. Affected paragraphs include:
  - [CMM 2008-04 02](#) (regarding Driftnet Prohibitions (**DNS**))—U.S. recommends removing and replacing with [CMM 2008-04 01](#) (DNS));
  - [CMM 2009-05 05](#) (regarding Data Buoys (**FAD**))—Second sentence is an encouragement and first sentence is overly broad;
  - [CMM 2017-04 05](#) (regarding Marine Pollution (**POL**)); and
  - [CMM 2019-05 08](#) (regarding Mobulid Rays (**RAY**)).

The U.S. supports retaining references to the following obligations but would also recommend some clarification to ROP reference materials because *portions* of those obligations are merely encouragements:

- [CMM 2009-05 05 \(FAD\)](#)—Retain but specify that the second sentence is merely an encouragement.
- [CMM 2019-05 05 \(RAY\)](#)— Retain but specify that the second sentence is merely an encouragement.
- Removal of Otherwise Unenforceable Obligations. The U.S. is proposing to remove or edit the following specific CMM paragraphs from the Questionnaire because the obligations (in whole or in part) are unenforceable against individual vessel owners, whose alleged compliance would become the subject of a new CCFS case and referral. Paragraphs falling into this category include:
  - [CMM 2019-05 06 \(RAY\)](#)—Remove in its entirety because, although the U.S. supports the intent of the obligation, compliance with it would only be verifiable after disembarkation in port, so this is an impractical subject for observers to monitor.
  - [CMM 2024-05 24 \(03\)](#) (regarding Sharks (**SHK**))—Remove this sub-paragraph of the obligation only (and retain the other sub-paragraphs) because 24(03) relates to activities that would often not be verifiable until after the catch is landed and disposed of at markets in port.
  - [CMM 2024-05 25 \(03, 04, 05\(b\), 06, and 07\)](#) (regarding Whale Sharks (**CWS**))—Remove reference to sub-paragraphs 25(3), 25(4), 25(5b), 25(6), and 25(7), which are all CCM obligations outside the scope of observer data collection.
- Clarification of Guidance to Observers for Some Retained Obligations. The U.S. is proposing to retain certain obligations that some others have recommended for removal from the WCPFC ROP Debriefing Questionnaire, but the U.S. also recommends that ROP reference materials be clarified to avoid confusion as follows:
  - [CMM 2018-04 04](#) (regarding Sea Turtles (**TUR**))—Retain but clarify that observers may disregard the last sentence of the paragraph, which obligates a CCM to adopt domestic legislation and is therefore not enforceable against individual vessel owners or operators, as would be supported by an Observer-Sourced CCFS case.
  - [CMM 2023-01 14 \(FAD\)](#)— Retain but clarify that only the first sentence of the obligation is relevant; observers may disregard the last two sentences, which involve notice by CCMs to the Secretariat and are therefore impractical for observers to monitor.
  - [CMM 2018-03 06](#) (regarding Sea Birds (**BIR**))—Retain for now, and (i) ensure that ROP reference materials reproduce the relevant tables from this CMM, if not already included, and (ii) conduct further discussions

with interested stakeholders regarding the practicality of tasking ROP observers with monitoring for the obligation.

- Inclusion/Retention of Specific Obligations for Monitoring. The U.S. is actively supporting the retention of certain CMM paragraphs in the ROP Debriefing Questionnaire, such as the full Cetaceans paragraphs ([CMM 2024-07 01–04 \(CWS\)](#)) and [CMM 2018-05 15\(g\)](#) (regarding allegations of Observer Obstruction (**OBS**)), to ensure they remain part of the observer's monitoring scope.

Worth highlighting here are several such obligations, for which the U.S. disagrees with calls to remove them by other stakeholders, including certain obligations that the U.S. proposes should be retained in their entirety, as specified:

- [CMM 2024-05 08 \(SHK\)](#)—Retain because observers can record a yes/no response regarding whether the vessel has landed sharks with their fins naturally attached or not.
- [CMM 2024-05 09 \(SHK\)](#)—Retain, but edit ROP reference materials to clarify that in monitoring for compliance with this obligation, observers are expected only to record whether alternative measures were used and whether they were complied with.
- [CMM 2024-05 14 \(SHK\)](#)—Retain because observers can verify whether vessels did, in fact, retain on board, transship, and/or land fins harvested in contravention of the obligation.
- [CMM 2024-05 15 \(SHK\)](#)—Retain because observers can verify compliance with the requirement that carcasses and fins be landed and/or transshipped together.

Similarly, although the U.S. supports retaining references to the following obligations in the WCPFC ROP Debriefing Questionnaire, some clarification to ROP reference materials may be warranted as follows:

- [CMM 2019-05 \(10\) \(RAY\)](#)—Retain because, although the U.S. agrees with PNA+'s observation that the obligation also goes to observer interference (**OBS**), the U.S. recommends that allegations going to this obligation only be recorded in one place—here, as “RAY” CCFS Case Types—in order to avoid inflated statistics, and because charging the conduct under both theories remains available to Responsible CCMs exercising prosecutorial discretion, domestically.

The U.S. defers to the ROP for technical considerations of whether to accomplish the above via amendments to the MSDFs or by other means.

ii. *Summary of Obligations & Case-Type Identifiers for Observer-Sourced CCFS Cases from pp. 8–9 of WCPFC22-2025-IP04b, incorporating U.S. feedback in redline.*

**ANNEX 4: Proposed “Redline” List of Obligations for Inclusion in ROP Observer Records for Possible CCFS/Enforcement Referral from [PDF pages 10–32 of WCPFC22-2025-IP04b](#)**

Below, the U.S. shares its comments on whether certain WCPFC obligations are appropriate for inclusion on a forthcoming WCPFC ROP Debriefing Questionnaire in the below table, which is an abbreviated and annotated version of the table on [PDF pages 10–32 of WCPFC22-2025-IP04b](#). New comments by the United States are shown in green italicized font (e.g., *new comment*) and reflecting the U.S.’s recommended insertions in underlined, blue font (e.g., insertions), and showing proposed deletions in stricken, red font (e.g., ~~delete~~):

| CMM   | Obligation / CMM Paragraph (Full Text)   | Comments   |
|---|--|--|
| <b>OBSERVER OBSTRUCTION</b> <u>(currently “OAI”)—Case Type Identifier: “OBS”</u>  |  |  |
| <a href="#">CMM 2018-05</a><br>CMM for the ROP<br>(eff. 12 Feb 2019 -<br>Current)   | <a href="#">CMM 2018-05 15(g)</a> (“(g) The Commission ROP shall be operated to ensure that observers shall not be unduly obstructed in the discharge of their duties. To this extent, CCMs of the Commission shall ensure that vessel operators comply with the Guidelines in Annex B — Guidelines for the Rights and Responsibilities of Vessel Operators, Captains and Crew.”)  | PNA <sup>9</sup> supports maintaining this paragraph<br><br><i>USA: Supports including this paragraph in the WCPFC ROP Debriefing Questionnaire.</i>   |
| <b>DRIFTNET PROHIBITION (NEW)</b> <u>—Case Type Identifier: “DNS”</u>   |  |  |
| <a href="#">CMM 2008-04</a><br>CMM to Prohibit<br>the Use of Large<br>Scale Driftnets on<br>the High Seas of<br>the Convention<br>Area<br>(eff. 10 Feb 2009 -<br>Current) | <del>CMM 2008-04 02 (“2. CCMs shall take all measures necessary to prohibit their fishing vessels from using large-scale driftnets while on the high seas in the Convention Area.”)</del><br><br><a href="#">CMM 2008-04 01</a> (“1. The use of large-scale driftnets <sup>1</sup> on the high seas within the Convention Area shall be prohibited and such nets shall be considered prohibited fishing gear, the use of which shall constitute a serious violation in accordance with Article 25 of the Convention.” ([Footnote 1: “Large-scale driftnets” are defined as gillnets or other nets or a combination of nets that are more than 2.5 kilometers in length whose purpose is to enmesh, entrap, or entangle fish by drifting on the surface of, or in, the water column.”]) | PNA supports maintaining<br><br><u><i>PNA comment: Suggest leaving it out and keep it for debriefing process as no high impact at the moment</i></u><br><br><i>USA: Notes that the current obligation identified (paragraph 2) is not enforceable against individual vessel owners or operators, as in a domestic enforcement action. Instead, the U.S. proposes inclusion of CMM 2008-04 01 instead, notwithstanding the lack of existing “obligation” webpage for this paragraph of the CMM.</i> |

<sup>9</sup> PNA members including Tokelau and Vanuatu. PNA comments included here are reflected as closely as possible to those appearing in the table on [PDF pages 10–32 of WCPFC22-2025-IP04b](#), showing PNA comments from the lefthand column of that table in orange color, regular font, and showing underlined and italicized PNA columns from the righthand column in the ROP-IWG paper in orange color, underlined and italicized font.

| CMM   | Obligation / CMM Paragraph (Full Text)  | Comments  |
|---|---|---|
| <b>FISHING ON DATA BUOYS PROHIBITION</b> <a href="#">(NEW)</a> & <b>FAD CLOSURE –TROPICAL PURSE SEINE</b> <a href="#">(currently “FAI”)</a><br>—Case Type Identifier “ <b>FAD</b> ” <sup>10</sup> |   |   |
| <b>CMM 2009-05</b><br>CMM Prohibiting Fishing on Data Buoys<br>(eff. 09 Feb 2010 - Current)   | <b>CMM 2009-05 01</b> (“1. CCMs shall prohibit their fishing vessels from fishing within one nautical mile of or interacting with a data buoy in the high seas of the Convention Area, which includes, but is not limited to, encircling the buoy with fishing gear; tying up to or attaching the vessel, or any fishing gear, part or portion of the vessel, to a data buoy or its mooring; or cutting a data buoy anchor line.”)<br><br><b>CMM 2009-05 03</b> (“3. CCMs shall prohibit their fishing vessels from taking on board a data buoy unless specifically authorized or requested to do so by the Member or owner responsible for that buoy.”)<br><br><del>CMM 2009-05 05 (“5. CCMs shall require their fishing vessels that become entangled with a data buoy to remove the entangled fishing gear with as little damage to the data buoy as possible. CCMs are encouraged to require their fishing vessels to report to them all entanglements and provide the date, location and nature of the entanglement, along with any identifying information contained on the data buoy. CCMs shall notify the Secretariat of all such reports.”)</del> | PNA support to maintain para 01 and 03 but question mark about para 05 if it is observer level or CCM level.<br><br><i><u>PNA comment: Suggest leaving it out and keep it for debriefing process.</u></i><br><br><i><u>USA: Supports including paras 01 and 03 but recommends removing para 05 from the WCPFC ROP Debriefing Questionnaire because it is unenforceable. The first sentence in para 05 lacks specificity as to what constitutes “as little damage . . . as possible,” and the second sentence in para 05 is merely an encouragement to CCMs.</u></i> |
| <b>CMM 2023-01</b><br>CMM for Bigeye, Yellowfin and Skipjack Tuna in the Western & Central Pacific Ocean<br>(eff. 06 Feb 2024 - Current)  | <b>CMM 2023-01 13</b> (“13. A one and a half (1 1/2) months (July to mid-August) prohibition of deploying, servicing or setting on FADs shall be in place between 0001 hours UTC on 1 July and 2359 hours UTC on 15 August each year for all purse seine vessels, tender vessels, and any other vessels operating in support of purse seine vessels fishing in exclusive economic zones and the high seas in the area between 20oN and 20oS.” (footnote omitted))   | PNA supports maintaining.<br><br><i><u>PNA comment: suggest that it be made available publicly on the website and circulate widely to Observer providers so observer can be advised during placement.</u></i><br><br><i><u>USA: Supports including all of para 13 in the WCPFC ROP Debriefing Questionnaire</u></i>   |
| <b>CMM 2023-01</b><br>CMM for Bigeye, Yellowfin and Skipjack Tuna in the Western & Central Pacific Ocean<br>(eff. 06 Feb 2024 - Current)<br><br>[continued]                                       | <b>CMM 2023-01 14</b> (“14. In addition to the one and a half month FAD closure in paragraph 13, except for those vessels flying the Kiribati flag when fishing in the high seas adjacent to the Kiribati exclusive economic zone, and Philippines’ vessels operating in HSP1 in accordance with Attachment 2, it shall be prohibited to deploy, service or set on FADs in the high seas for one additional month of the year. <del>Each CCM shall decide which one month (either April, May, November or December) shall be closed to setting on FADs by their fleets in the high seas for 2024, 2025, 2026 and notify the Secretariat of that decision by March 1, each year. In case a CCM decides to change the notified period at any given year of the application of this CMM this shall be notified to the Secretariat before 1st March of that year.”)</del>   | PNA supports maintaining.<br><br><i><u>USA: Would encourage observer reference materials to specify that only the first sentence of para 14 is relevant; the last two sentences of para 14 (stricken in the column to the left) involve notice by CCMs to the Secretariat and therefore are not appropriate for observer notation.</u></i>  |

<sup>10</sup> The ROP-IWG draft table separates Fishing on Data Buoys Prohibitions from FAD-Closure Prohibitions, but the U.S. suggests combining the two into one “FAD” category for CCFS purposes. For that reason, the discussion of CMM 2023-01 appearing here appears earlier in this table than in the ROP-IWG draft, in which that obligation is discussed on [PDF pp. 13–14 of WCPFC22-2025-IP04b](#).
